DATA TO ACTION, MENTAL HEALTH INSIGHTS

Data Insights was created to break down the community health assessment and delve into all of the information on mental health because it ranks top in community concerns. We need to take what we know about mental health and what information we need to collect to help us strategize as a group and measure those things to make an impact.

GUIDED DISCUSSION WITH MENTAL HEALTH PROVIDERS

There can be many factors that play into mental health disorders and that is what we want to hear. What are some of the challenges that providers in the community are experiencing? Provider input is needed so that we can see some of the challenges they face. What type of technology do they use? What would make it easier for providers to expand services? What type of clinical staff do you have?

COMMUNITY STRATEGIES

Going forward, please join the Mental Health Advisory Committee on mygarrettcounty and take the survey.

Update information in the Behavioral Health Provider Guide.
