

## **ATTENTION PARENTS**

# **LET YOUR VOICES BE HEARD!**

*Help Improve Services For Children and Youth  
With Special Health Care Needs*

### **Participate in the 2017 Maryland Parent Survey!**

The Parents' Place of Maryland and Maryland's Department of Health and Mental Hygiene (DHMH) Office for Genetics and People with Special Health Care Needs (OGPSHCN) are conducting this survey to find out about your child's health care needs.

### **Why should I take the 2017 Maryland Parent Survey?**

To ensure that parents/caregivers of children with special needs have access to support services, especially as it relates to health. This includes children with conditions like asthma, sickle cell disease, autism, attention deficit disorder, depression, allergies, and many others. Your input is critical to improving health and services for children and youth in your community.

This survey is available both in paper and online.

### **Who should fill out the survey?**

Parents and caregivers of children with special needs (ages birth–21 years). You will not need to give your name or any personal information.

### **How do I take the survey?**

Go to: <https://www.surveymonkey.com/r/ParentSurvey17>. For a paper copy of the survey or for more information, please contact Stacy Taylor at the Parents' Place of Maryland at 410-768-9100 or e-mail [stacy@ppmd.org](mailto:stacy@ppmd.org)

**Thank you for your help!**
