

#### **OVERVIEW**

#### Because Health Equity Matters

We each have our own ideas about what it means to be healthy, what we feel the biggest issues are for ourselves, and the community we live in. Unfortunately, the issues we face depend dramatically on what we're able to afford. When we think about health, it cannot be adequately discussed without acknowledging that our health is fundamentally affected by our income. Concerns like: affordability of health insurance, adequate treatment services to address mental health issues, honestly looking at how addiction can happen to anyone in a community, and addressing food insecurities, which left unchecked, can deeply impact a community overtime. Every community chooses to confront these challenges in different ways that reflect the varying sensibilities and priorities of the people who live within it. What is consistent, however, is that a community is better equipped to make informed decisions regarding policies and strategies, and is poised to respond together when data is shared transparently across sectors. Once we all have the most accurate and up-to-date information we can continue doing what works and begin to create new opportunities for a prosperous future.

The Community Health Assessment contained on the following pages provides the most accurate information available to us at this point in time. This document is a summary of work that has continued since the previous assessment publication in 2016.

The United States National Forum on Information Literacy defines information literacy as "... the hyper ability to know when there is a need for information, to be able to identify, locate, evaluate, and effectively use that information for the issue or problem at hand." Our goal is to provide the best quality information currently available to our community, so they can intelligently and actively participate in the decisions that impact them.

The Population Health, Innovation & Informatics Unit within the Garrett County Health Department thanks the organizations that contributed to this assessment and encourages our partners to use it to inform planning to make Garrett County a healthier place to live, work and play. Please join us as we endeavor to make a difference in our community by participating on mygarrettcounty.com.

#### **EXECUTIVE SUMMARY**

#### 2019 Garrett County Community Health Assessment

This Community Health Assessment is simply a slice in time of a dynamic process contiguous with our efforts to make a difference in the lives of those we serve. Great care and attention was placed on collecting as much data as possible from the many subsections within our community. Expertise was garnered from NACCHO's MAPP guidelines and documentation to ensure rigorous standards during our needs assessment process.

"Assessing our community is vital to understanding how we can better serve, layering the data that's available with our own primary sources creates a platform for responsive action."

- Robert Stephens, Garrett County Health Officer

Extensive research was conducted from April 13th through August 13th, 2019. We conducted 10 focus groups and analyzed responses from 2,102 web based and paper surveys completed by staff, community organizations, and stakeholders. We also evaluated secondary sources of information about our community. The assessment included the social determinants of health, which are factors like employment, housing, transportation, etc... that affect the health of the community, and are vital to improving population health.

The Health Planning Council, the Assessment Planning Committee, and many community members all played key roles in pulling this information together for this report. We are pleased to publish this document and wish to convey gratitude for all those who took an interest and spent valuable time making this possible.

We more than doubled our participation from the previous assessment efforts, with 2,102 people participating in the focus groups and community survey, making this sample size statistically significant for our county! In addition to county wide significance, we had all but two zip codes with enough participation to count them as statistically significant in our analysis. This outstanding turnout of community participation on a primary data collection level enables us to develop robust and culturally informed improvement strategies based on accurate prioritization.

#### **RESULTS**

#### Thousands of Voices, One Vision

In order to best understand the status of health in our communities, it's critical that we gather, analyze, and seek to understand the issues in our communities and how people perceive them.

Community health assessments typically use both primary and secondary data to characterize the health of the community:

- **Primary data** refers to the first-hand data gathered by the researcher themselves, is real-time and is often collected first-hand through surveys, and focus groups.
- **Secondary data** refers to data collected by someone else, in the past for another entity and/or purpose.

Balancing these data sources helps illustrate the most complete picture of our community, and its ever evolving people, resources, and needs.

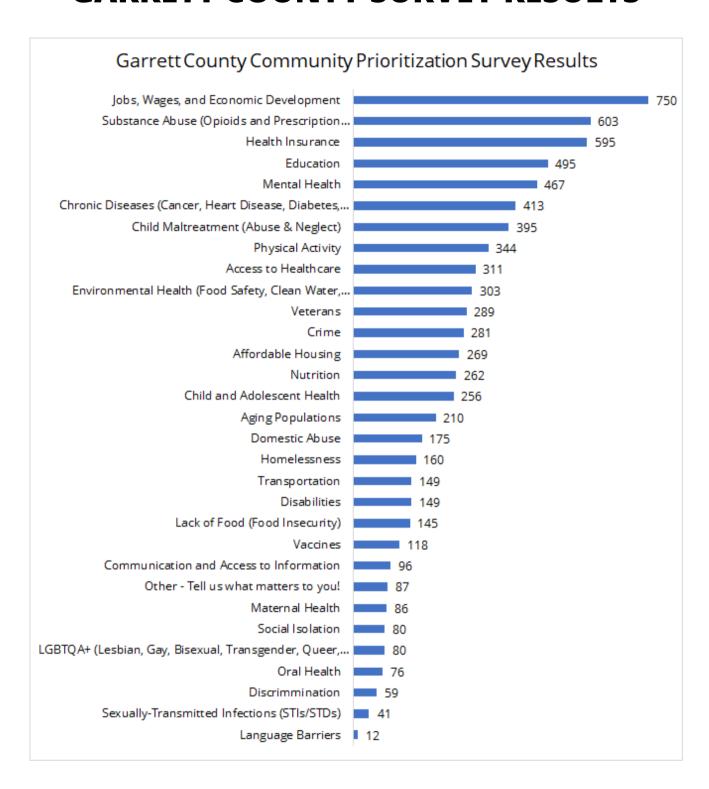

Immediately following are the aggregate results of our community prioritization survey that was conducted both county-wide and regionally to collect primary data on community-driven need identification, down to the zip code level.

Additional primary data was collected through a series of focus groups. The qualitative data from all of the groups have been analyzed and is summarized following the prioritization report.

https://www.cdc.gov/publichealthgateway/cha/data.html https://www.nihlibrary.nih.gov/resources/subject-guides/health-data-resources/common-data-types-public-health-research

#### **GARRETT COUNTY SURVEY RESULTS**

These results reflect the responses of participants in Garrett County, Maryland zip codes, and do not include regional responses. Additional data, tables, and tools for this dataset, as well as regional datasets are provided in the supplement.

#### REGIONAL SURVEY RESULTS

These results reflect the responses of regional participants. Additional data, tables, and tools for this dataset, as well as Garrett County datasets are provided in the supplement.

#### Conversations Run Deeper

Focus groups were held in a guided conversation format about the top five issues people identified as their main concern in our latest community prioritization survey. The top priority identified on the survey in the region, the entire county, and in every zip code, with the exception of Kitzmiller, was Jobs, Wages, & Economic Development.

This priority and the themes central to **Jobs, Wages, & Economic Development** that have been synthesized from the focus groups are consistent with data provided in this report. There is a generalized fear that our towns are "dying" due to population decline, lack of affordable housing, school closures in communities, and a lack of competitive job opportunities. Conversation about how to keep our young people in the area and offer them a way to thrive was a significant portion of every focus group. High speed internet that is both available and affordable to the entire county was both a consistent complaint and offered as a strategy. If high speed internet was available in every area of the county it could support job growth and people being able to work remotely for larger employers and remain in the area (tele-work). Some focus groups made the direct correlation between higher incomes and improved health outcomes, stating when you "have enough money, and a safe environment, the opportunity to live a healthier life is greater than those without."

**Health Insurance** as a priority was high ranking, second in the region, third in the county and, second for four of the zip codes, first in Kitzmiller. The consensus around this priority from the focus groups is that those working lower paying jobs could not afford the insurance plans offered by their employers so they typically don't have any insurance at all. Additionally, there were those who currently have insurance, but were concerned about future costs and being able to afford care later in life.

**Substance Abuse** continues to be a priority, ranking third in the region, second in the county and second for three of the zip codes. It's important to remember this category is broad and includes opioids, prescription medications, alcohol, tobacco, and other drugs. The conversations were as broad as the category itself. Those with personal experiences spoke bravely about how hard it was to receive proper treatment and that there are not adequate resources, especially for youth. Those who haven't had first hand experience reported watching neighbors sell drugs and senior citizens sell pills so they can afford to eat. They spoke of grandparents raising grandchildren, and the hardship of drug affected children on the education system. A hardship on employers was also reported.

#### **Community Composition**

**Education** as a priority ranks fourth both in the region and in the county. Attention focused in two main areas: the public school system and vocational opportunities for youth in the county. Questions concerning appropriate resource allocation was a common theme, with better pay for quality teachers, and the concern of more school closures. Communities that have lost their elementary schools spoke of the compounding negative effects. The threat of school closures for other communities was also common and perceived to be what will take away all hope from any growth that may occur in the area. The burden of behavioral issues presenting in classrooms due to increased drug use overlaps with the substance abuse priority. However, in this context it was spoken about as concern for the teachers not having the resources - either the capacity and/or extra help in the classroom and the potential to compromise the education of other students. Training in vocational areas where students are taught a trade, in some cases including certification such as journeyman or welder, was discussed as an opportunity to make our area more attractive. Although it was noted we have vocational programs in the high schools, the consensus was that the programs are underfunded and the options for going further are very limited. Free tuition at Garrett College was perceived as a tremendous benefit, but for those who can't or don't want to transfer for a higher degree, the ability to earn a living wage without skilled trade is often difficult. With the cost of college completely out of reach for many families and the shortage of skilled labor this was an area communities wanted to explore further.

**Mental Health** ranks fifth both in the region and county on the consumer surveys. Digging deeper into this topic in the focus groups proved to be quite complex making it difficult to identify themes. However, a theme that carried over from 2016 was that mental health services are still insufficient, and despite high demand, the root of the problem is lack of access – or the ability to find care. Psychiatry is elusive and non-existent for youth, and tele-psych was reportedly still unreliable due to internet connection, billing, and insurance issues. Although there has been an effort to expand services in the area, many still feel as though it's difficult to receive proper treatment.

#### Challenges Voiced During the Focus Groups (Direct Quotes)

"We have nothing here to keep young people in the area."

"Do we have a trade school in the county? I'm not talking about a driving school."

"You can get healthier with higher incomes, we're making progress — "

"My concern is the next 5-20 years, do we have the next generation or two behind us to attract and keep?"

"I have a good job-but the broadband thing-although my job allows me to work from home, I can't."

"This town is really dwindling – the school is gone, no one is moving into town- it's going to be a ghost town."

"Lack of high speed internet around the county- how do we move into the future? It effects tourism, giving people tools—so many opportunities are online."

"I wish I knew who to complain to so it would make a difference."

"Disparity of affordable housing - I'm not talking about subsidized housing, \$900 a month for rent or more is not affordable."

"What is my retirement going to look like? Trying to guess at what my medical needs will be and if I have medical concerns- will I be destitute without the insurance?"

"Health Insurance? We can't afford it."

"My kids have it through the state but it's still not enough."

"We pay our own way."

"I'm a transplant- I still don't feel like I belong after 25 years. That's what people who are born here call me, a transplant."

"People don't respect one another."

"People don't have open minds."

"I married a native but my friends are not."

#### Challenges Voiced During the Focus Groups (Direct Quotes)

"It's the kids that grow up and are even born addicted. Drugs and what they do to the kids is the saddest part."

"Highest level of our society – grandparents are raising kids– affluent people."

"Senior citizens are selling their drugs for food."

"Parents in the schools need more education, alcohol is just as bad."

"Insurance didn't go out of the state."

"If you haven't been around other races you just don't know how to act"

"A lot of people drink too much."

"House was broken into and the only thing that was stolen was whisky."

"Meth was big- but they arrested the two dealers."

"If people had hobbies, or play sports that might help-It gives me purpose. If they find something they are passionate about...."

"Addicts and seniors are mixed together in housing."

"Judgmental about people who use drugs. Addiction is not a choice-"

"People can't pass a drug test."

"They need to focus on the elementary school -they keep talking about shutting it down. The bank and the post office will probably leave too. If you don't have a school- you don't have a community. It's shortsighted of them to close the school."

"We lack psych. Telepsych - if the internet goes down it's hard for mental health patients. It's bad for adults and even harder for adolescents. It's much more stigmatized in a small community."

"We have more problems than people realize."

# WHAT DO YOU LYVE ABOUT LIVING IN GARRETT COUNTY?

"Sense of community- everybody is related—they watch out for your kids"

"Strong volunteer base"

"Church involvement"

"Great senior site that provide much needed meals"

"Outdoor activities"

"Very friendly, waving, and polite, skies are very blue, hear birds, no smog"

"If there is a need this community comes together."

"Slower pace and four distinct seasons."

"We love our land, space, very neighborly but there is still space."

"Good area to feel safe and watch wildlife and walk in the woods. People are so friendly and kind and willing to help."

"An experience that's hard to appreciate unless you've lived elsewhere"

"The spirituality of the mountain."

"There are kind people, always someone watching out for you."

#### Longing for Respect & Belonging

In contrast to this theme, discussions with those that have had dissimilar experiences in small towns in the county were explored. This quote taken from a focus group may challenge your perspective,

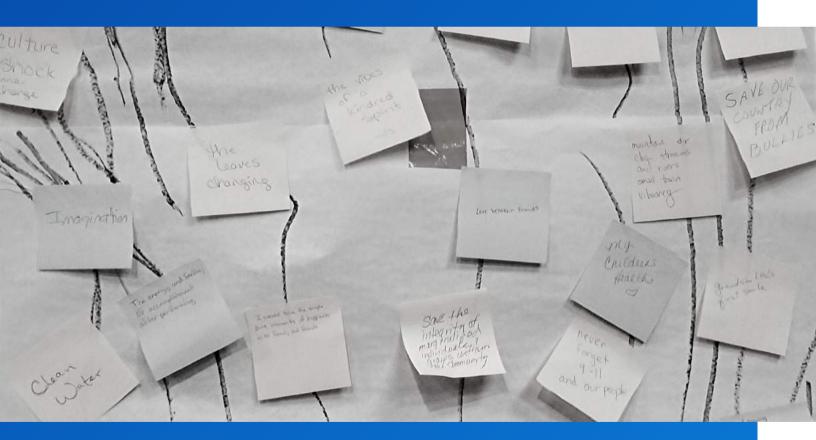

"there is a difference between a polite community and one that truly embraces a person."

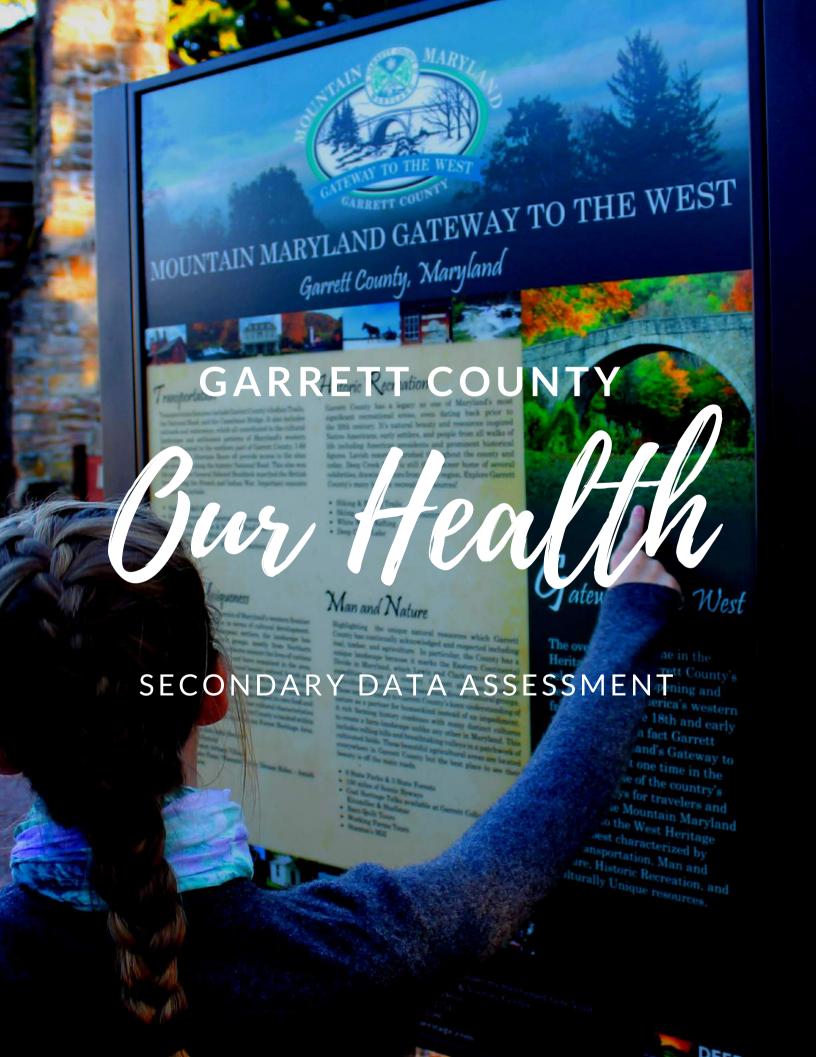

If you've never been the person treated differently, it may be difficult to understand. However, when asking the open-ended question about what makes a community healthy, the notion of the need for belonging kept surfacing. Regardless of whether you are from the area or not, being different in any way is perceived as a risk or disadvantage in Garrett County.

One person put it this way,

"it's a safe community for everyone, unless you're on the margin."

A call for open mindedness and general respect for people was recorded multiple times in the various focus groups.

#### Secondary Data Analysis

In today's digital environment, data is more accessible than ever, and emerging innovations, such as the Garrett County Planning Tool (mygarrettcounty.com), present tremendous opportunities to better understand the constructs at work within our communities.

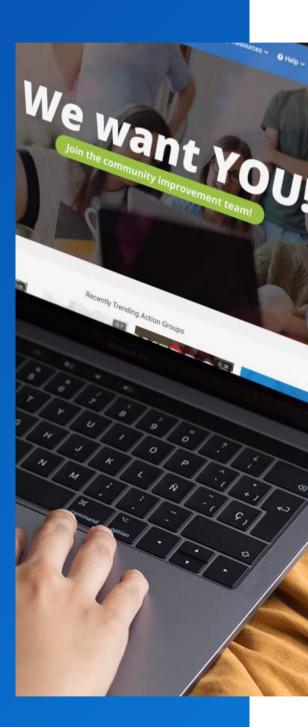

The supplemental datasets highlighted throughout this document are assembled snapshots from a broad sweep of community, regional, state, and federal data warehouses, and are provided for reference. These resources are designed to be investigative prompts, rather than exhaustive datasets.

Many of these reports and datasets were aggregated from numerous sources, and often, compared across state and regional boundaries to better illuminate the disparities that exist within different data frames. This means that some data may not be an exact match, and further analysis may be needed to flush out the differences in reporting across jurisdictions (i.e.; broadband access matches, Maryland vs. West Virginia vs. federal reporting, et cetera).

All information, data, tools, and materials contained within this report are provided without warranty. While every attempt was made to verify data throughout the process, many datasets, archives, and agencies sourced throughout are still striving to improve data quality and consistency in reporting.

The reports that follow were assembled with resources from secondary sources, and should not be considered conclusive or valid, nor interpreted for use, without reconciliation and verification outside of the discussion and supplements within this document. This report is the first attempt to reconcile these datasets, and results/data points may evolve or change over time, or as additional information becomes available.

Verification and further research are vital to ensuring that data provides transparency and promotes the most effective and efficient courses of action for community health improvement.

#### **Community Composition**

Garrett County is a unique rural community situated in the westernmost corner of Maryland. According to the census, it is a large county with a geographic base of 656 square miles, and 46.5 persons per square mile (US Census, 2010). Our low population density ranks Garrett County as the third least populous county in Maryland. Natural beauty abounds with plenty of open space to enjoy with over 98,276 acres of parks, lakes and publicly accessible forestland.\* The county is bordered by West Virginia and Pennsylvania and is considered a tri-state area.

According to the 2017 ACS 5-year population estimate, the population of Garrett County was 29,516 - continuing to decrease from 30,097 reported in 2010. This is important to note because population loss is one of the main indicators of a weak regional economy.\*\* Only 15,720 people made up the labor force in Garrett County, a regionally small proportion relative to total population (more info in Regional Indicators Supplement). The migration of young people to urban areas coupled with aging populations continues to be a challenge for our region; however, a comprehensive secondary data analysis indicated that local systems of support are more aptly prepared to address rapidly aging populations than most, excluding economic concerns and health insurance.

Median household income hit an all time high in 2018 for the nation and Maryland was ranked the wealthiest state, with a median household income of \$83,242. Garrett County remains well below that at \$48,174. This more closely aligns us with our neighboring state of West Virginia, which is one of the poorest states with a median income of \$44,061. The population of West Virginia fell by 2.5% over the past eight years, the largest decline of any state. An article analyzing the richest and poorest states noted, "the GDP of West Virginia increased by just 1.8% a year on average — less than half the 4.1% national growth rate. Like the nation as a whole, the largest drag on economic growth was the state's mining sector."\*\*\* Related to this for our region was the 131 year old Luke Paper Mill closure, a devastating blow to the Western Maryland region. Reported job loss from VERSO was 675 in June of 2109. However, that does not account for the industry support jobs, many of whom were small companies or self-employed individuals. It remains to be seen just how deeply this closure will impact the people in our region, and how long it will take to recover.

<sup>\*\*\*</sup>https://247wallst.com/specialreport/2019/10/01/americas-richest-and-poorest-states-8/

#### Affordable Housing Impacts

Ensuring that everyone has a decent place to live is vital to improving population health. The affordable housing debate is one of many that is a topic of concern not only nationally, but also here at home. Simplicity is not the cornerstone of this debate, as there are layers of complexity that confound solutions.

The National Low Income Housing Coalition publishes a report annually showing the "housing wage" that a person would need to earn full time (40 hours a week, 52 weeks a year) in order for a two-bedroom rental unit to be affordable by the official government standard. The report states, "In the United States, the 2014 two-bedroom Housing Wage is \$18.92. This national average is more than two-and-a-half times the federal minimum wage, and 52% higher than it was in 2000. In no state can a full-time minimum-wage worker afford a one-bedroom or a two-bedroom rental unit at Fair Market Rent."\*

We naturally ask the questions, affordable for who and how many units are available for rent in the region? This was a common discussion that ran across several of our focus groups during this assessment. The federal Department of Housing and Urban Development (HUD) defines an "affordable dwelling" as one that a household can obtain for 30 percent or less of its income. However, this varies from place to place.

Shockingly, affordable housing, a known vital social determinant of health, remains elusive, pending further analysis that illustrated significantly higher Home Purchase Loan Origination by Loan Amounts of Under \$60,000 (Garrett: 4.48%, Allegany: 19.29%) and \$60,000-\$119,999 (Garrett: 18.49%, Allegany: 43.85%). In Garrett County, it is difficult to find a reliable data source to report affordable rental units at any given time. Our vacant property rates are more than triple both national and state rates at 38.24% in Garrett County (more info in Regional Indicators Supplement). This data is a starting place to aid local leaders as they evaluate housing policies, zoning, and other issues related to affordable housing. More data is needed as this complex issue continues to hinder economic growth in the region.

<sup>\*</sup>https://reports.nlihc.org/oor/2014

#### Hidden in Plain Sight

Balancing community priorities with secondary data sources as we seek to be responsive to the needs of the community can be a complex process. In some cases the secondary data supports the community priorities, and in other cases, it doesn't.

Due to the extensive nature of this the report, highlighting a few areas that demonstrate this point is important for broader community coalition conversations in order to work toward reconciliation.

Despite low interest from those surveyed, the first area of concern is sexually-transmitted infections (STIs/STDs). It was rated next to last on the community priority list. However, there appears to be increasing prevalence of diagnoses of chlamydia and HIV longitudinally in the region.

The second area of concern is child maltreatment, which is often defined as physical injury (not necessarily visible) of a child under circumstances that indicate that a child's health or welfare is harmed or at substantial risk of being harmed. Data sources record this differently, so it's important to consider what the sources are measuring, but rates have consistently been one of the worst in the state of Maryland and do not indicate improvement.

A call to action for increased aggregate data sharing on the Garrett County Planning Tool from agencies that track different nuances of the larger issue of child maltreatment is needed. Information about local foster care cases and domestic abuse may help us understand the complexities children and adolescents are facing.

Another area of note is the lack of reliable data around obesity and other chronic diseases, including diabetes. Data that is available does not indicate adolescents or adults prioritize healthy eating habits, exercise, limiting alcohol use, or avoiding tobacco. Further assessment is needed on the efforts that are being made in the community to address these issues.

Substance abuse has remained in the top three priorities from primary data collected through community surveys and focus groups since we began formal assessments in 2016. Chronic Disease remains the main cause of death and significantly surpasses all others including overdoses, yet people are not as concerned with heart disease. This is evident in our primary data results and the extensive programmatic efforts funded by multiple agencies to reduce substance abuse. A cultural shift is needed to reinforce the importance of healthy lifestyles on overall quality and length of life.

#### State of Health Equity

Despite the traditionally white (96.3%, not Hispanic or Latino), homogeneous population in Garrett County, documentation of severe health inequities among minority populations has provided additional insight as our community composition begins to change. While previous analysis of the region has focused on economic inequities, we are expanding the conversation to include racial and LGB inequities, based on the datasets discovered through expanded research.

Through accompanying supplements, the following critical indicators have been identified:

Garrett County, MD ranked the poorest among neighboring communities for Black or African American (50%) and Other (31.9%) races for No High School Diploma by Race Alone, Black or African American (34.33%) races for Uninsured Populations by Race Alone, and Black or African American (85.71%) races for Population in Poverty by Race Alone (more info in Regional Indicator Supplement).

From 2000 to 2010, the White population in Garrett County decreased, while the Black or African American population increased 135.16% (more info in County Indicator Supplement).

Additionally, the results of the Maryland Youth Risk Behavior Survey (more info in Supplement) point to additional disparities among Gay, Lesbian, and Bisexual youth, indicating that these populations reported, in aggregate, No Difference or More Likely than Heterosexual to experience every risk behavior reported by Maryland through the national YRBS tool designed "to monitor health behaviors that contribute markedly to the leading causes of death, disability, and social problems among youth and adults in the United States."\*

While these populations are small comparatively, these statistics present insurmountable difficulties for racial and sexual orientation minorities in our community and warrant further examination and consideration in developing equity-based practices to improve population health.

<sup>\*</sup>https://www.cdc.gov/healthyyouth/data/yrbs/overview.htm

#### Hope on the Horizon

Despite these disappointing findings, there are several promising trends for Garrett County on the horizon.

One of the most important indicators for economic advancement in the modern age is broadband access.\*

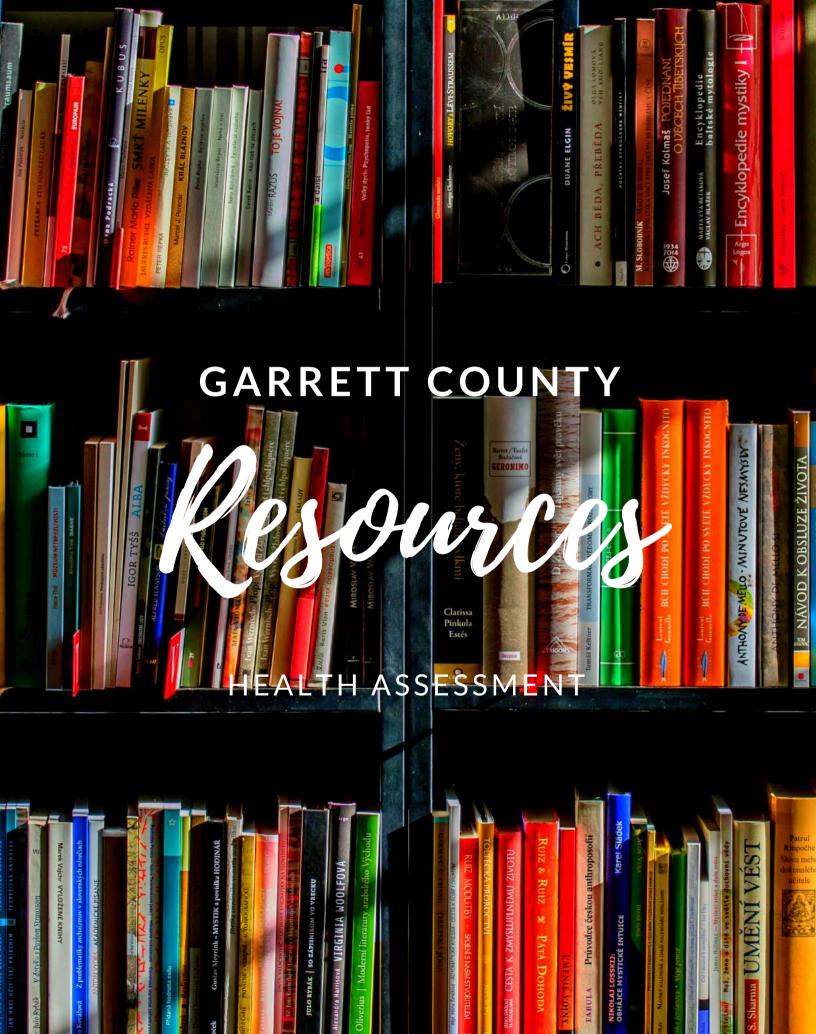

Depending on the report referenced, this range varies greatly (up to a disputed estimate of 100%, including mobile broadband access), and is further compounded by promising innovations and developments, such as the Neubeam initiative in partnership with Garrett County Government to find innovative solutions to increase consistent broadband access throughout the county. Further, the addition of Sprint, a major national carrier to several adjacent counties could provide additional infrastructure upon which to see additional advancements in community access.

In addition to this promising pathway that seems aptly timed to succeed in propelling Garrett County to the front of the line in rural communities primed to compete in the growing remote jobs market, a new indicator has been uncovered that shows additional promise for Garrett County by means of access to transportation. As reported in the accompanying Regional Indicator Supplement, only 6.84% of households lacked access to a motor vehicle in Garrett County, compared to 10.66% in Allegany County. This relatively low figure illustrates the need to isolate the contributing factors to low/no transportation access, as the issue may be more readily resolved or alleviated through niche-targeted methods, rather than difficult systems-level modifications.

Finally, the dedicated efforts of Garrett Regional Medical Center and many local agencies and organizations, including the greatly appreciated Cindy's Fund, may be contributing factors worth further investigation, as Garrett County now has the lowest Age-Adjusted Death Rate for Cancer Mortality (137.5 Per 100,000 Pop.) in the entire sampled region (more info in Regional Indicator Supplement). Garrett County's commitment to cancer treatment and community support should be duly noted and may prove to be an innovation model worth expanding to additional areas, pending further analysis.

#### **METHODOLOGY**

#### The Survey Instrument

The Garrett County Health Department's Population Health, Innovation, and Informatics Unit champions county-wide assessment, planning, and health improvement. These processes are reviewed at public Health Planning Council meetings held once a month at the Garrett County Health Department with a variety of stakeholders. Their mission: to ensure high quality, effective, and integrated community care system that is responsive to the needs of residents. For those unable to attend, every stakeholder and member of the public is invited join us digitally for a transparent look at these processes on mygarrettcounty.com.

In addition to the Health Planning Council meetings, local agencies and key stakeholder groups (consisting of staff from the Garrett County Health Department, Garrett County Local Management Board, Garrett County Behavioral Health Authority, Mountain Laurel Medical Center, and Garrett Regional Medical Center) met on March 12, 2019, to review a sample draft of the survey instrument. In order to ensure that our instrument captured the most valuable information and is equitable in design, this process was extended this cycle to include a one week, anonymous public comment window on the Garrett County Health Department's website at garretthealth.org from March 20 thru March 27, 2019.

#### **Public Review Results**

The survey instrument was open for public review from March 20, 2019, through March 27, 2019. The survey instrument review reached 481 people, was reviewed 46 times by 34 unique individuals without request for modification.

#### **METHODOLOGY**

#### Survey Launch

Up to the release event at the Garrett County Health Fair on April 13, 2019, staff, agency partners, and student volunteers equipped with iPads collected 197 surveys from health fair attendees. Email marketing and social ads were the primary modes of outreach utilizing the health department's extensive databases and strategic investments in digital technology, providing a return rate that more than doubled that of the previous assessment. The Community Action, Aging & Nutrition division assisted with a paper version for some of our most vulnerable residents.

Garrett Regional Medical Center, Garrett College, Mountain Laurel, Garrett County Health Department, County Government, Community Action, and Garrett County Public School System specifically requested staff and clients, when appropriate, to take the survey using the digital link. The Garrett County Population Health, Innovation & Informatics unit provided two incentives for participation, one for completion of the survey and one to participate in one of ten focus groups held around the county. In seventeen weeks, our collaborative effort yielded 2,102 surveys. Ten focus groups were conducted with 60 individuals in Garrett County who volunteered their time to help us understand more about the priorities selected for their zip codes.

The survey instrument and focus group script are available within the included supplement.

#### **EXTENDED TOOLS**

### Community Health Assessment Research Portal (CHArp)

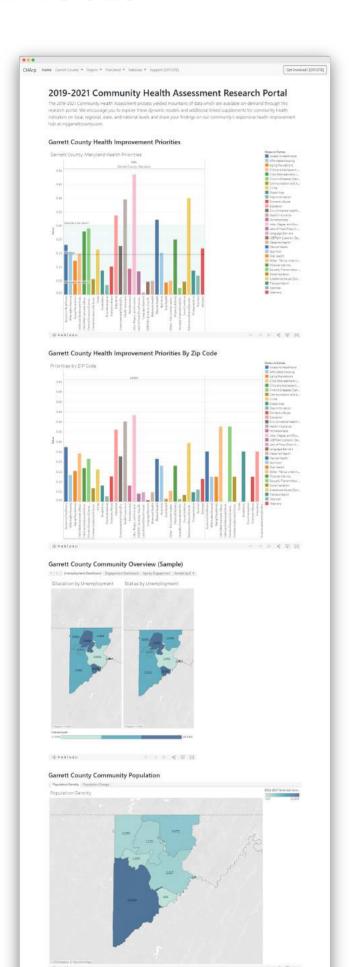

While the presence of narrative and thorough analysis of data is vital to guiding the community health improvement process, it is equally important to ensure that datasets and resources are accessible and interactive for end-users to draw their own conclusions. Thus, this cycle marks the first time that community stakeholders can explore a dynamic portal designed specifically for the assessment process to generate need reports, assess prioritization, and ensure that health equity is a concept central to all activities in and around population health in Garrett County, Maryland.

To this end, Garrett County has developed an open source research tool available at:

#### garrettcountyhealthdepartment.github.io/CHArp

In addition to the easily accessible and interactive digital tools, charts, and maps available within the tool, each interactive element is mapped to a Tableau public sheet that includes relevant metadata for further analysis.

We greatly welcome your feedback on this new application via the built-in support mechanism for this tool.

BHA BEHAVIORAL HEALTH AUTHORITY XLMB LOCAL MANAGEMENT BOARD

#### Garrett County & Surrounding Areas Community Needs Assessment (2019-2021)

#### Welcome!

The following survey is being conducted by the Garrett County Health Department with the Garrett County Local Management Board, Garrett County Behavioral Health Authority, Mountain Laurel Medical Center, and Garrett Regional Medical Center.

This survey should take approximately 2-5 minutes to complete, and all responses are anonymous. The results of this survey will help determine the prioritization of the next Garrett County Community Health Improvement Plan.

Please do not enter any personally identifiable information in any open text fields. Once you complete the survey, you will have the opportunity to enter your name in the prize drawing.

Thank you for taking time to help make our local communities healthier places to live, work, and play!

*	1. What is your zip code?	

2.	What issues matter most to you? Selec	t or	enter up to 5 (five).
	Maternal Health		Sexually-Transmitted Infections (STIs/STDs
	Child and Adolescent Health		Domestic Abuse
	Physical Activity		Disabilities

#### **Focus Group Script**

2019 Community Health Assessment

- Introductions:
  - My name is NAME and my role today is to help guide this discussion and learn more about what you think and how you feel. I will be working through a script and asking a lot of questions.
  - This focus group is a guided conversation about the top five issues people identified as their main concern in our latest community prioritization survey. We had 2,102 responses from the regional area and of those responses- NUMBER were from the ZIP zip code and the following topics were identified as the top five issues in this zip code that we want to talk more deeply about today:
    - The First topic is: Jobs, wages, economic development
    - Second topic is: Substance Abuse (opioids, prescription drugs, tobacco and alcohol
    - Third topic is: Health Insurance
    - Fourth topic is: Mental Health
    - Fifth topic is: Education
  - o In 2016 we published our first Garrett County Health Assessment. I like to think about like a slice in time. It's a picture of a dynamic process that helps us collect data to better define our community's needs. The intention is to use this data to better serve our residents. We use data about our area from federal, state and now local sources. SHOW Survey This survey helps to narrow down the priorities and now we get to talk about why we think these are issues people are concerned about. It's also a time to explore solutions that can become strategies in the health improvement plan to address our issues.
  - We publish the assessment that gives us all the data we can find and then we publish the improvement plan. It's a measurable report that is accessible to everyone On-line and can be adjusted and updated as we together to make improvements.
  - I invite to visit mygarrettcounty.com to become involved with the topics that you are most passionate about. We'll have an opportunity after the group concludes to show you how it works.
  - There are a few guidelines for our discussion today:
    - We want to be respectful of one another, so we need to allow people to have an opportunity to finish their thoughts and not be interrupted and allow everyone an opportunity to be heard. You may not agree with the opinions or perceptions of others in this group and that is okay- we want it to be a welcoming place for people to share their own experiences without judgement for the purpose of having many different perspectives deepen the discussion.

Garrett County, a healthier place to live, work, and play!

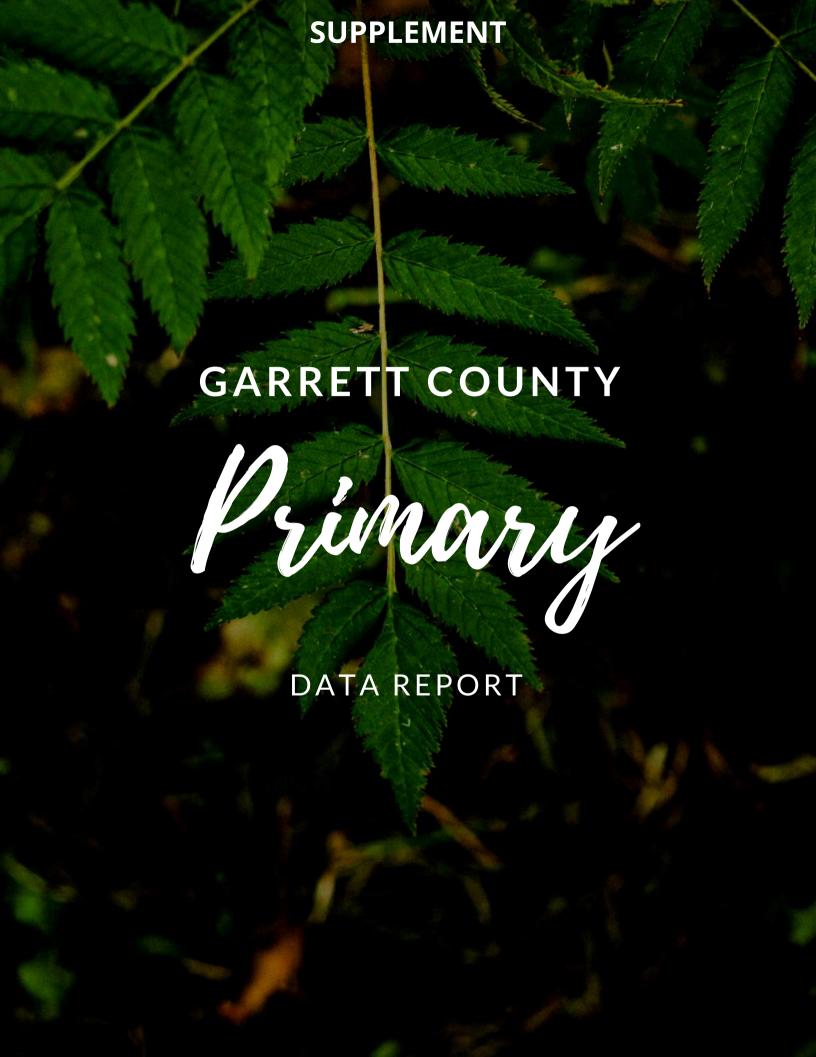

garretthealth.org

- I will be recording our time for the ease of analysis, but I will use pseudo names in the reporting. I will use quotes as it relates to certain topics because themes emerge as we progress through our focus group cycle. We have nine scheduled in several areas of the county.
- I need your consent to record our discussion and use the data. I will turn the recorder on and we will begin by going around the table and saying yes.
- So our purpose today on DATE: To explore job, wages & economic development, substance abuse, health insurance and education with community members in the ZIP zip code in the context of building, improving and sustaining a healthy community.
- We'll start by talking about what you like the most about living in your community.
- What are some things that could improve how you feel about living here?
- Let's describe what a healthy community looks and feels like?
- On a scale of 1-5—one being very unhealthy and 5 being very healthy how does your community rate?
  - o Why?
  - o Why not?
- Thinking about what you just told me I would like to reflect on the role Jobs, Wages and Economic development play in the health of a community.
- Let's talk about these as it relates to ZIP:
  - What services, programs, or strategies could we have to do a better job of addressing jobs, wages and economic development?

Garrett County, a healthier place to live, work, and play!

#### **Change in Total Population**

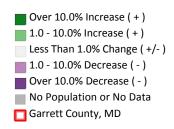

According to the United States Census Bureau Decennial Census, between 2000 and 2010 the population in the report area grew by 251 persons, a change of 0.84%. A significant positive or negative shift in total population over time impacts healthcare providers and the utilization of community resources.

#### **Population Under Age 18**

An estimated 19.34% of the population in the report area is under the age of 18 according to the U.S. Census Bureau American Community Survey 2013-17 5-year estimates. An estimated total of 5,709 youths resided in the area during this time period. The number of persons under age 18 is relevant because this population has unique health needs which should be considered separately from other age groups.

#### Population Age 18-64

This indicator reports the percentage of population age 18-64 in the designated geographic area. This indicator is relevant because it is important to understand the percentage of adults in the community, as this population has unique health needs which should be considered separately from other age groups.

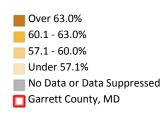

Report Area	Total Population	Population Age 18-64	Percent Population Age 18-64
Garrett County, MD	29,516	17,681	59.9%
Maryland	5,996,079	3,799,281	63.36%
United States	321,004,407	199,670,739	62.2%

#### **Population in Limited English Households**

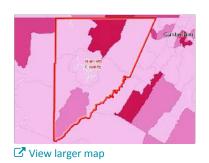

This indicator reports the percentage of the population aged 5 and older living in Limited English speaking households. A "Limited English speaking household" is one in which no member 14 years old and over (1) speaks only English at home or (2) speaks a language other than English at home and speaks English "Very well." This indicator is significant as it identifies households and populations that may need English-language assistance.

#### **Renter-Occupied Housing**

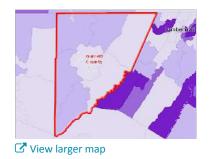

Tenure provides a measurement of home ownership, which has served as an indicator of the nation's economy for decades. This data covers all occupied housing units, which are classified as either owner occupied or renter occupied. These data are used to aid in the distribution of funds for programs such as those involving mortgage insurance, rental housing, and national defense housing. Data on tenure allows planners to evaluate the overall viability of housing markets and to assess the stability of neighborhoods. The data also serve in understanding the characteristics of owner occupied and renter occupied units to aid builders, mortgage lenders, planning officials, government agencies, etc., in the planning of housing programs and services.<sup>3</sup>

#### **Renter-Occupied Housing**

All occupied housing units that are not owner occupied, whether they are rented or occupied without payment of rent, are classified as renter occupied.

Report Area	Total Occupied Housing Units	Renter-Occupied Housing Units	Percent Renter-Occupied Housing Units

#### **Household Composition**

This indicator reports the total number and percentage of households by composition (married couple family, nonfamily, etc.). According to the American Community Survey subject definitions, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption\*. A non-family households is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

\*Family households and married-couple families do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption.

Report Area	Total Households	Family Households	Family Households, Percent	Non-Family Households	Non-Family Households, Percent

# Social & Economic Factors

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community's ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

## Children Eligible for Free/Reduced Price Lunch

Within the report area 1,906 public school students or 49.73% are eligible for Free/Reduced Price lunch out of 3,833 total students enrolled. This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs. Additionally, when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

Report Area	Total Students	Number Free/Reduced Price Lunch Eligible	Percent Free/Reduced Price Lunch Eligible
Garrett County, MD	3,833	1,906	49.73%
Maryland	886,215	413,580	46.67%
United States	50,737,716	24,970,187	49.21%

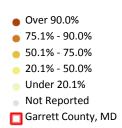

Note: This indicator is compared to the state average.

# Population with a Bachelor's Degree or Higher, Percent by Tract, ACS 2013-17

#### **Education - Head Start**

This indicator reports the number and rate of Head Start program facilities per 10,000 children under age 5. Head Start facility data is acquired from the US Department of Health and Human Services (HHS) 2018 Head Start locator. Population data is from the 2010 US Decennial Census.

Report Area	Total Children Under Age 5	Total Head Start Programs	Head Start Programs, Rate (Per 10,000 Children)
Garrett County, MD	1,553	10	38.63
Maryland	364,488	202	4.58
United States	20,426,118	18,886	7.18

Note: This indicator is compared to the state average.

Data Source: US Department of Health & Human Services, Administration for Children and Families. 2018. Source geography: Point

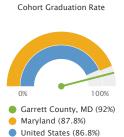

Head Start Facilities, All Facilities, ACF 2018Garrett County, MD

Within the report area 92% of students are receiving their high school diploma within four years. Data represents the 2016-17 school year.

This indicator is relevant because research suggests education is one the strongest predictors of health (Freudenberg & Ruglis, 2007).

Report Area	<b>Total Student Cohort</b>	Estimated Number of Diplomas Issued	<b>Cohort Graduation Rate</b>
Garrett County, MD	289	266	92%
Maryland	63,192	55,509	87.8%
United States	3,095,906	2,688,701	86.8%

Note: This indicator is compared to the state average.

Data Source: US Department of Education, EDFacts. Accessed via DATA.GOV. Additional data analysis by CARES. 2016-17. Source geography: School District

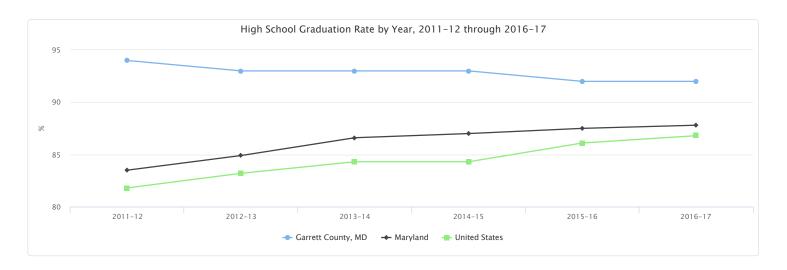

## High School Graduation Rate by Year, 2011-12 through 2016-17

The table below shows local, state, and National trends in cohort graduation rates.

Note: Data for some states are ommitted each year when they fail to meet federal reporting standards or deadlines. Use caution when comparing national trends as the "universe" population may differ over time..

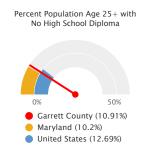

Report Area	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17
Garrett County, MD	94%	93%	93%	93%	92%	92%

United States	81.8%	83.2%	84.3%	84.3%	86.1%	86.8%

## **Education - No High School Diploma**

Within the report area there are 2,332 persons aged 25 and older without a high school diploma (or equivalency) or higher. This represents 10.91% of the total population aged 25 and older. This indicator is relevant because educational attainment is linked to positive health outcomes (Freudenberg & Ruglis, 2007).

Report Area	Total Population Age 25+	Population Age 25+ with No High School Diploma	Percent Population Age 25+ with No High School Diploma	
Garrett County, MD	21,378	2,332	10.91%

#### **Education - Student Reading Proficiency (4th Grade)**

This indicator reports the percentage of children in grade 4 whose reading skills tested below the "proficient" level for the English Language Arts portion of the state-specific standardized test. This indicator is relevant because an inability to read English well is linked to poverty, unemployment, and barriers to healthcare access, provider communications, and health literacy/education.

Report Area	Total Students with Valid Test Scores	Percentage of Students Scoring 'Proficient' or Better	Percentage of Students Scoring 'Not Proficient' or Worse	
Garrett County, MD	296	37%	63%	
Maryland	68,659	41.77%	58.23%	
United States	3,569,598	50.79%	46.4%

United States	2,458,358	3.24%	8,010,060	10.56%

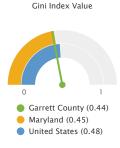

# Income - Inequality (GINI Index)

This indicator reports income inequality using the Gini coefficient. Gini index values range between zero and one. A value of one indicates perfect inequality where only one house-hold has any income. A value of zero indicates perfect equality, where all households have equal income.

Index values are acquired from the 2013-17 American Community Survey and are not available for custom report areas or multi-county areas.

Report Area	Total Households	Gini Index Value		
Garrett County, MD	11,865	0.44		
Maryland	2,181,093	0.45		
United States	118,825,921	0.48		

Note: This indicator is compared to the state average. Data Source: US Census Bureau, American Community Survey. 2013-17. Source geography: Tract

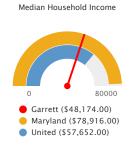

#### Income - Median Household Income

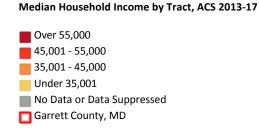

This indicator reports median household income based on the latest 5-year American Community Survey estimates. This includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income.

Report Area	Total Households	Average Household Income	Median Household Income
Garrett County, MD	11,865	\$63,130.00	\$48,174.00
Maryland	2,181,093	\$103,845.00	\$78,916.00
United States	118,825,921	\$81,283.00	\$57,652.00

Note: This indicator is compared to the state average.

# **Insurance - Uninsured Population**

The lack of health insurance is considered a key driver of health status.

In the report area 7.52% of the total civilian non-institutionalized population are without health insurance coverage. The rate of uninsured persons in the report area is greater than the state average of 7.34%. This indicator is relevant because lack of insurance is a primary barrier to healthcare access including regular primary care, specialty care, and other health services that contributes to poor health status.

Report Area	Total Population (For Whom Insurance Status is Determined)	Total Uninsured Population	Percent Uninsured Population	
Garrett County, MD	29,037	2,185	7.52%	
Maryland	5,901,303	433,369	7.34%

# **Population Receiving SNAP Benefits (SAIPE)**

This indicator reports the average percentage of the population receiving the Supplemental Nutrition Assistance Program (SNAP) benefits between the months of July 2014 and July 2015. This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs; when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

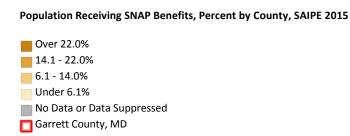

Report Area	Total Population	Population Receiving SNAP Benefits	Percent Population Receiving SNAP  Benefits
Garrett County, MD	29,460	4,335	14.7%
Maryland	6,006,401	758,789	12.6%
United States	321,396,328	44,567,069	13.9%

## **Poverty - Children Below 100% FPL**

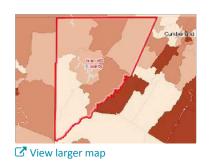

In the report area 16.96% or 929 children aged 0-17 are living in households with income below the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

Report Area	Total Population	Population Under Age 18	Population Under Age 18 in Poverty	Percent Population Under Age 18 in Poverty

#### **Teen Births**

This indicator reports the rate of total births to women age of 15 - 19 per 1,000 female population age 15 - 19. This indicator is relevant because in many cases, teen parents have unique social, economic, and health support services. Additionally, high rates of teen pregnancy may indicate the prevalence of unsafe sex practices.

Report Area	Female Population Age 15 - 19	Births to Mothers Age 15 - 19	Teen Birth Rate (Per 1,000 Population)
Garrett County, MD	1,044	33	31.7

# **Unemployment Rate**

Total unemployment in the report area for the current month equals 760, or 4.8% of the civilian non-institutionalized population age 16 and older (non-seasonally adjusted). This indicator is relevant because unemployment creates financial instability and barriers to access including insurance coverage, health services, healthy food, and other necessities that contribute to poor health status.

Report Area	Labor Force	Number Employed	Number Unemployed	Unemployment Rate

#### **Violent Crime**

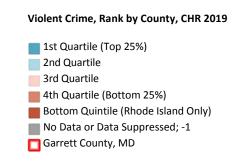

This indicator reports information about violent crime offenses reported by law enforcement. In the report area, 66 violent crimes occurred during the 2014-16 three year period. The violent crime rate of 223.5 which is lower than the statewide rate of 461.8. Violent crime includes homicide, rape, robbery, and aggravated assault.

Report Area	Violent Crimes	Violent Crime Rate (Per 100,000 Pop.)
Garrett County, MD	66	223.5
Maryland	27,691	461.8
United States	1,205,137	384.8

# Young People Not in School and Not Working

# **Physical Environment**

A community's health also is affected by the physical environment. A safe, clean environment that provides access to healthy food and recreational opportunities is important to maintaining and improving community health.

#### Air Quality - Particulate Matter 2.5

This indicator reports the percentage of days with particulate matter 2.5 levels above the National Ambient Air Quality Standard (35 micrograms per cubic meter) per year, calculated using data collected by monitoring stations and modeled to include counties where no monitoring stations occur. This indicator is relevant because poor air quality contributes to respiratory issues and overall poor health.

Report Area	Total Population	Average Daily Ambient Particulate Matter 2.5	Number of Days Exceeding Emissions Standards	Percentage of Days Exceeding Standards, Crude Average	Percentage of Days Exceeding Standards, Pop. Adjusted Average
Garrett County, MD	30,097	8.72	0	0	0%

United States	0.24	0.18	0.19	0.10

# Air Quality - Respiratory Hazard Index

This indicator reports the non-cancer respiratory hazard index score. This score represents the potential for noncancer adverse health effects, where scores less than 1.0 indicate adverse health effects are unlikely, and scores of 1.0 or more indicate a potential for adverse health effects.

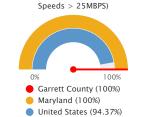

Report Area	Total Population	Respiratory Hazard Index Score
Garrett County, MD	30,097	0.53
Maryland	5,773,465	2.01
United States	312,576,287	1.83

Data Source: EPA National Air Toxics Assessment.

#### **Built Environment - Broadband Access**

This indicator reports the percentage of population with access to high-speed internet. Data are based on the reported service area of providers offering download speeds of 25 MBPS or more and upload speeds of 3 MBPS or more. This data represent both wireline and fixed/terrestrial wireless internet providers. Cellular internet providers are not included. This indicator is important because access to technology opens up opportunities for employment and education.

Report Area	Total Population (2010)	Access to DL Speeds > 25MBPS (2017)

## **Built Environment - Recreation and Fitness Facility Access**

This indicator reports the number per 100,000 population of recreation and fitness facilities as defined by North American Industry Classification System (NAICS) Code 713940. This indicator is relevant because access to recreation and fitness facilities encourages physical activity and other healthy behaviors.

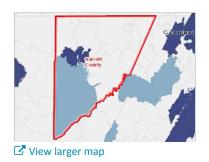

Report Area	<b>Total Population</b>	Number of Establishments	Establishments, Rate per 100,000 Population
Garrett County, MD	30,097	2	6.65

# Climate & Health - High Heat Index Days

This indicator reports the percentage of recorded weather observations with heat index values over 103 degrees Fahrenheit. The "heat index" is a single value that takes both temperature and humidity into account. The higher the heat index, the hotter the weather feels, since sweat does not readily evaporate and cool the skin. The heat index is a better measure than air temperature alone for estimating the risk to workers from environmental heat sources.

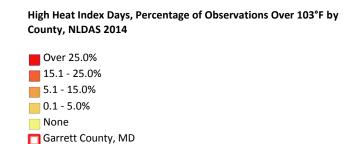

Report Area	Total Weather Observations	Average Heat Index Value	Observations with High Heat Index Values	Observations with High Heat Index Values, Percentage
Garrett County, MD	4,745	86.77	0	0%
Maryland	64,605	90.9	1,194	1.8%
United States	19,094,610	91.82	897,155	4.7%

Note: This indicator is compared to the state average.

Data Source: National Oceanic and Atmospheric Administration, North America Land Data Assimilation System (NLDAS). Accessed via CDC WONDER. Additional data analysis by CARES.

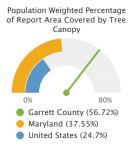

# Climate & Health - Tree Canopy

This indicator reports the percentage of the report area that is covered by tree canopy. Report data is based on analysis of the 2011 National Land Cover Database - Tree Canopy analytical dataset.

Report Area	Total Population	Area Covered by Canopy, Percentage	Area Covered by Canopy, Population Weighted Percentage
Garrett County, MD	30,097	62.21%	56.72%
Maryland	5,773,552	46.26%	37.55%
United States	306,675,006	30.23%	24.7%

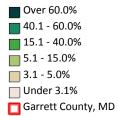

Note: This indicator is compared to the state average.

Data Source: Multi-Resolution Land Characteristics Consortium, National Land Cover Database 2011. Additional data analysis by CARES. 2011. Source geography: Tract

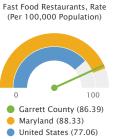

#### **Food Environment - Fast Food Restaurants**

This indicator reports the number of fast food restaurants per 100,000 population. Fast food restaurants are defined as limited-service establishments primarily engaged in providing food services (except snack and nonalcoholic beverage bars) where patrons generally order or select items and pay before eating. This indicator is relevant because it provides a measure of healthy food access and environmental influences on dietary behaviors.

Report Area	<b>Total Population</b>	Number of Establishments	Establishments, Rate per 100,000 Population
Garrett County, MD	30,097	26	86.39
Maryland	5,773,552	5,100	88.33
United States	308,745,538	237,922	77.06

Note: This indicator is compared to the state average.

Data Source: US Census Bureau, County Business Patterns. Additional data analysis by CARES. 2016. Source geography: ZCTA

 ${\it Data Source: US Department of Agriculture, Economic Research Service, USDA-Food Access Research Atlas.~2015.}$ 

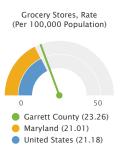

## **Food Environment - Grocery Stores**

This indicator reports the number of grocery stores per 100,000 population. Grocery stores are defined as supermarkets and smaller grocery stores primarily engaged in retailing a general line of food, such as canned and frozen foods; fresh fruits and vegetables; and fresh and prepared meats, fish, and poultry. Included are delicatessen-type establishments. Convenience stores and large general merchandise stores that also retail food, such as supercenters and warehouse club stores are excluded. This indicator is relevant because it provides a measure of healthy food access and environmental influences on dietary behaviors.

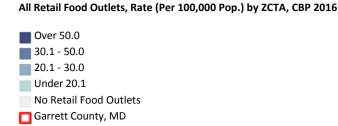

Report Area	<b>Total Population</b>	Number of Establishments	Establishments, Rate per 100,000 Population
Garrett County, MD	30,097	7	23.26
Maryland	5,773,552	1,213	21.01
United States	308,745,538	65,399	21.18

Note: This indicator is compared to the state average.

Data Source: US Census Bureau, County Business Patterns. Additional data analysis by CARES. 2016. Source geography: ZCTA

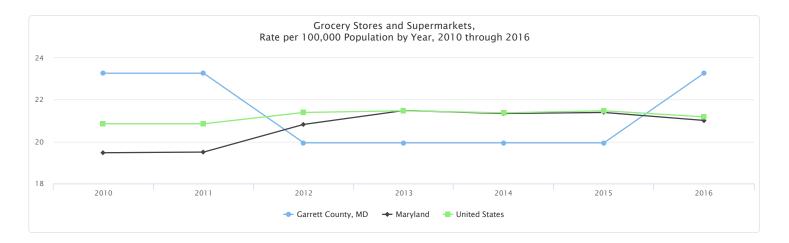

# Grocery Stores and Supermarkets, Rate per 100,000 Population by Year, 2010 through 2016

United States	20.85	20.85	21.39	21.47	21.37	21.47	21.18

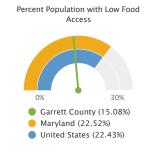

#### **Food Environment - Low Food Access**

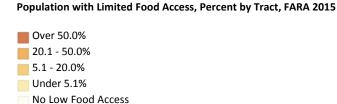

This indicator reports the percentage of the population with low food access. Low food access is defined as living more than ½ mile from the nearest supermarket, supercenter, or large grocery store. Data are from the 2017 report, Low-Income and Low-Supermarket-Access Census Tracts, 2010-2015. This indicator is relevant because it highlights populations and geographies facing food insecurity.

Report Area	<b>Total Population</b>	Population with Low Food Access	Percent Population with Low Food Access
Garrett County, MD	30,097	4,539	15.08%
Maryland	5,773,552	1,300,059	22.52%

# **Housing - Housing Cost Burden (30%)**

This indicator reports the percentage of the households where housing costs exceed 30% of total household income. This indicator provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels.

Report Area	Total Households	Cost Burdened Households (Housing Costs Exceed 30% of Income)	Percentage of Cost Burdened Households (Over 30% of Income)
Garrett County, MD	11,865	3,018	25.44%

# Cost Burdened Households by Tenure, Total

This data shows the number of households that spend more than 30% of the household income on housing costs. In the report area, there were 3,018 cost burdened households according to the U.S. Census Bureau American Community Survey (ACS) 2013-2017 5-year estimates. The data for this indicator is only reported for households where household housing costs

and income earned was identified in the American Community Survey.

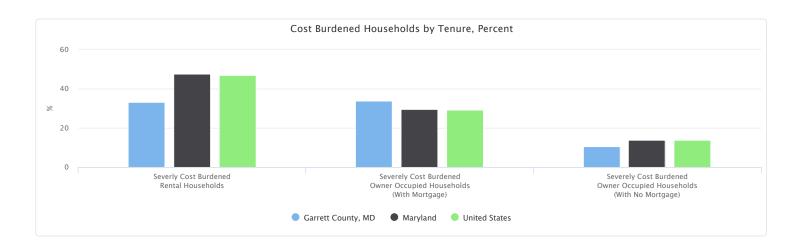

Report Area	Cost Burdened Households	Cost Burdened Rental Households	Cost Burdened Owner Occupied Households (With Mortgage)	Cost Burdened Owner Occupied Households (With No Mortgage)
Garrett County, MD	3,018	886	1,700	432

#### **Housing - Substandard Housing**

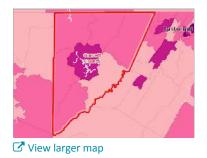

This indicator reports the number and percentage of owner- and renter-occupied housing units having at least one of the following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1.01 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30%, and 5) gross rent as a percentage of household income greater than 30%. Selected conditions provide information in assessing the quality of the housing inventory and its occupants. This data is used to easily identify homes where the quality of living and housing can be considered substandard.

Report Area	Total Occupied Housing Units	Occupied Housing Units with One or More Substandard Conditions	Percent Occupied Housing Units with One or More Substandard Conditions

#### Substandard Housing: Households Lacking Complete Plumbing Facilities

Complete plumbing facilities include: (a) hot and cold running water, (b) a flush toilet, and (c) a bathtub or shower. All three facilities must be located inside the house, apartment, or mobile home, but not necessarily in the same room. Housing units are classified as lacking complete plumbing facilities when any of the three facilities is not present.

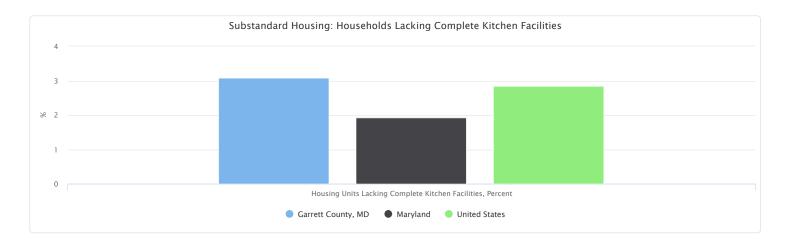

Report Area	Total Occupied Housing Units	Housing Units Lacking Complete Plumbing Facilities	Housing Units Lacking Complete Plumbing Facilities, Percent
Garrett County, MD	11,865	66	0.56%
Maryland	2,181,093	6,769	0.31%
United States	118,825,921	470,774	0.4%

#### Substandard Housing: Households Lacking Complete Kitchen Facilities

A unit has complete kitchen facilities when it has all three of the following facilities: (a) a sink with a faucet, (b) a stove or range, and (c) a refrigerator. All kitchen facilities must be located in the house, apartment, or mobile home, but they need not be in the same room. A housing unit having only a microwave or portable heating equipment such as a hot plate or camping stove should not be considered as having complete kitchen facilities. An icebox is not considered to be a refrigerator.

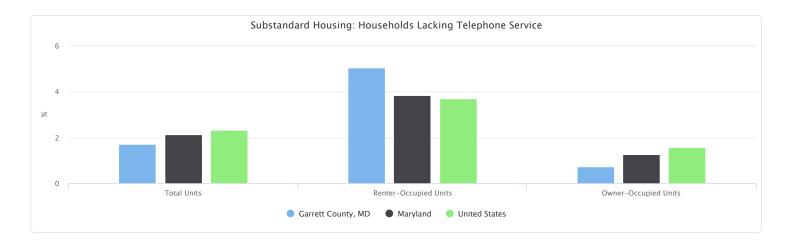

Report Area	Total Occupied Housing Units	Housing Units Lacking Complete Kitchen Facilities	Housing Units Lacking Complete Kitchen Facilities, Percent
Garrett County, MD	19,211	592	3.08%
Maryland	2,427,014	46,909	1.93%
United States	135,393,564	3,859,746	2.85%

#### Substandard Housing: Households Lacking Telephone Service

A telephone must be in working order and service available in the house, apartment, or mobile home that allows the respondent to both make and receive calls. Households that have cell-phones (no land-line) are counted as having telephone service available. Households whose service has been discontinued for nonpayment or other reasons are not counted as having telephone service available.

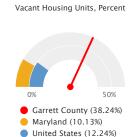

Report Area	Total Housing Units Lacking Telephone Service	Total Housing Units Lacking Telephone Service	Owner-Occupied Units Lacking Telephone Service	Owner-Occupied Units Lacking Telephone Service	Renter-Occupied Units Lacking Telephone Service	Renter-Occupied Units Lacking Telephone Service
Garrett County, MD	203	1.71%	68	0.74%	135	5.06%
Maryland	46,132	2.12%	18,307	1.26%	27,825	3.84%
United States	2,775,560	2.34%	1,180,204	1.56%	1,595,356	3.71%

#### **Housing - Vacancy Rate**

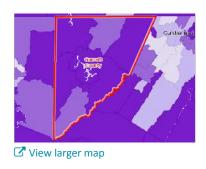

This indicator reports the number and percentage of housing units that are vacant. A housing unit is considered vacant by the American Community Survey if no one is living in it at the time of interview. Units occupied at the time of interview entirely by persons who are staying two months or less and who have a more permanent residence elsewhere are considered to be temporarily occupied, and are classified as "vacant."

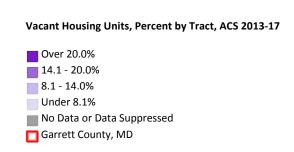

Report Area	Total Housing Units	Vacant Housing Units	Vacant Housing Units, Percent
Garrett County, MD	19,211	7,346	38.24%
Maryland	2,427,014	245,921	10.13%
United States	135,393,564	16,567,643	12.24%

Note: This indicator is compared to the state average.

Garrett County, MD	4.62%	22.93%	45.4%
Maryland	2.16%	7.37%	38.82%
United States	2.57%	7.45%	40.15%

#### Clinical Care

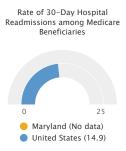

A lack of access to care presents barriers to good health. The supply and accessibility of facilities and physicians, the rate of uninsurance, financial hardship, transportation barriers, cultural competency, and coverage limitations affect access.

Rates of morbidity, mortality, and emergency hospitalizations can be reduced if community residents access services such as health screenings, routine tests, and vaccinations. Prevention indicators can call attention to a lack of access or knowledge regarding one or more health issues and can inform program interventions.

#### **30-Day Hospital Readmissions**

This indicator reports the percentage of Medicare fee-for-service beneficiaries readmitted to a hospital within 30 days of an initial hospitalization discharge.

Report Area	Medicare Part A and B Beneficiaries	Rate of 30-Day Hospital Readmissions among Medicare Beneficiaries
Garrett County, MD	429	No data
Maryland	66,984	No data
United States	2,885,032	14.9

Note: This indicator is compared to the state average.

Data Source: Dartmouth College Institute for Health Policy & Clinical Practice, Dartmouth Atlas of Health Care.

#### **Access to Dentists**

This indicator reports the number of dentists per 100,000 population. This indicator includes all dentists - qualified as having a doctorate in dental surgery (D.D.S.) or dental medicine (D.M.D.), who are licensed by the state to practice dentistry and who are practicing within the scope of that license.

Report Area	Total Population, 2015	Dentists, 2015	Dentists, Rate per 100,000 Pop.
Garrett County, MD	29,460	12	40.73
Maryland	6,006,401	4,454	74.2

#### Access to Dentists, Rate (Per 100,000 Pop.) by Year, 2010 through 2015

This indicator reports the rate of dentists per 100,000 population by year.

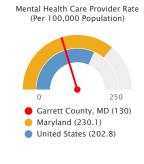

Report Area	2010	2011	2012	2013	2014	2015
Garrett County, MD	36.5	33.3	36.8	33.5	37.1	40.7
Maryland	64.7	67.6	69.5	71.8	73.6	74.2
United States	58.9	60.3	61.7	63.2	64.7	65.6

#### **Access to Mental Health Providers**

This indicator reports the rate of the county population to the number of mental health providers including psychiatrists, psychologists, clinical social workers, and counsellors that specialize in mental health care.

Report Area	Estimated Population	Number of Mental Health Providers  Ratio of Mental Health Providers to Population (1 Provider per x Persons)		Mental Health Care Provider Rate (Per 100,000 Population)
Garrett County, MD	29,233	38	769.3	130
Maryland	6,052,177	13,924	434.7	230.1
United States	317,105,555	643,219	493	202.8

Note: This indicator is compared to the state average.

Data Source: University of Wisconsin Population Health Institute, County Health Rankings. 2017. Source geography: County

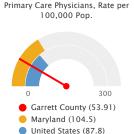

Garrett County, MD

#### **Access to Primary Care**

This indicator reports the number of primary care physicians per 100,000 population. Doctors classified as "primary care physicians" by the AMA include: General Family Medicine MDs and DOs, General Practice MDs and DOs, General Internal Medicine MDs and General Pediatrics MDs. Physicians age 75 and over and physicians practicing sub-specialties within the listed specialties are excluded. This indicator is relevant because a shortage of health professionals contributes to access and health status issues.

Report Area	Total Population, 2014	Primary Care Physicians, 2014	Primary Care Physicians, Rate per 100,000 Pop.	
Garrett County, MD	29,679	16	53.91

#### Diabetes Management - Hemoglobin A1c Test

This indicator reports the percentage of diabetic Medicare patients who have had a hemoglobin A1c (hA1c) test, a blood test which measures blood sugar levels, administered by a health care professional in the past year. In the report area, 534 Medicare enrollees with diabetes have had an annual exam out of 628 Medicare enrollees in the report area with diabetes, or 85%. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Report Area	Total Medicare Enrollees	Medicare Enrollees with Diabetes	Medicare Enrollees with Diabetes with Annual Exam	Percent Medicare Enrollees with Diabetes with Annual Exam
Garrett County, MD	4,671	628	534	85%
Maryland	626,992	74,974	64,326	85.8%

United States	83.52	83.81	84.18	84.57	84.92	85.16	85.69

#### **Federally Qualified Health Centers**

This indicator reports the number of Federally Qualified Health Centers (FQHCs) in the community. This indicator is relevant because FQHCs are community assets that provide health care to vulnerable populations; they receive extra funding from the federal government to promote access to ambulatory care in areas designated as medically underserved.

Report Area	Total Population	Number of Federally Qualified Health Centers	Rate of Federally Qualified Health Centers per 100,000  Population
Garrett County, MD	30,097	2	6.65

Garrett County, MD

#### **Lack of Prenatal Care**

This indicator reports the percentage of women who do not obtain prenatal care during their first trimester of pregnancy. This indicator is relevant because engaging in prenatal care decreases the likelihood of maternal and infant health risks. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Report Area	Total Births	Mothers Starting Prenatal Care in First Semester	Mothers with Late or No Prenatal Care	Prenatal Care Not Reported	Percentage Mothers with  Late or No Prenatal Care

#### **Preventable Hospital Events**

This indicator reports the discharge rate (per 1,000 Medicare enrollees) for conditions that are ambulatory care sensitive (ACS). ACS conditions include pneumonia, dehydration, asthma, diabetes, and other conditions which could have been

prevented if adequate primary care resources were available and accessed by those patients. This indicator is relevant because analysis of ACS discharges allows demonstrating a possible "return on investment" from interventions that reduce admissions (for example, for uninsured or Medicaid patients) through better access to primary care resources.

Report Area	Total Medicare Part A Enrollees	Ambulatory Care Sensitive Condition Hospital Discharges	Ambulatory Care Sensitive Condition Discharge Rate
Garrett County, MD	3,675	167	45.6

#### **Prevention - Mammogram**

This indicator reports the percentage of female Medicare enrollees, age 67-69, who have received one or more mammograms in the past two years. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge,

insufficient provider outreach, and/or social barriers preventing utilization of services.

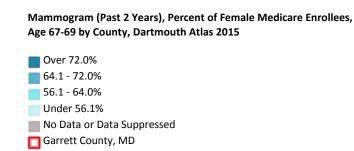

Report Area	Total Medicare Enrollees	Female Medicare Enrollees Age 67- 69	Female Medicare Enrollees with Mammogram in Past 2 Years	Percent Female Medicare Enrollees with Mammogram in Past 2 Year

Data Source: Centers for Disease Control and Prevention, Behavioral Risk Factor Surveillance System. Accessed via the 500 Cities Data Portal. 2015.

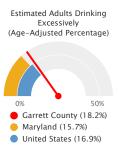

#### **Health Behaviors**

Health behaviors such as poor diet, a lack of exercise, and substance abuse contribute to poor health status.

#### **Alcohol Consumption**

This indicator reports the percentage of adults aged 18 and older who self-report heavy alcohol consumption (defined as more than two drinks per day on average for men and one drink per day on average for women). This indicator is relevant because current behaviors are determinants of future health and this indicator may illustrate a cause of significant health issues, such as cirrhosis, cancers, and untreated mental and behavioral health needs.

Report Area	Total Population Age 18+	Estimated Adults Drinking Excessively	Estimated Adults Drinking Excessively (Crude Percentage)	Estimated Adults Drinking Excessively (Age-Adjusted Percentage)

#### **Health Outcomes**

Measuring morbidity and mortality rates allows assessing linkages between social determinants of health and outcomes. By comparing, for example, the prevalence of certain chronic diseases to indicators in other categories (e.g., poor diet and exercise) with outcomes (e.g., high rates of obesity and diabetes), various causal relationship may emerge, allowing a better understanding of how certain community health needs may be addressed.

#### **Asthma Prevalence**

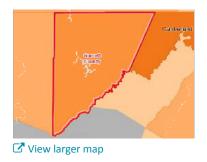

This indicator reports the percentage of adults aged 18 and older who self-report that they have ever been told by a doctor, nurse, or other health professional that they had asthma. This indicator is relevant because asthma is a prevalent problem in the U.S. that is often exacerbated by poor environmental conditions.

Report Area	Survey Population (Adults Age 18+)	Total Adults with Asthma	Percent Adults with Asthma
Garrett County, MD	26,077	3,670	14.1%
Maryland	4,418,284	603,074	13.6%

#### **Cancer Incidence - All Sites**

This indicator reports the age adjusted incidence rate (cases per 100,000 population per year) of cancer (all sites) adjusted to 2000 U.S. standard population age groups (Under age 1, 1-4, 5-9, ..., 80-84, 85 and older). This indicator is relevant because cancer is a leading cause of death and it is important to identify cancers separately to better target interventions.

Report Area	Estimated Total Population	New Cases (Annual Average)	Cancer Incidence Rate (Per 100,000 Pop.)
Garrett County, MD	1,987	82	412.6
Maryland	661,833	29,531	446.2

### Percentage of Medicare Population with Diabetes by Age

This indicator reports the prevalence of diabetes among Medicare beneficiaries by age.

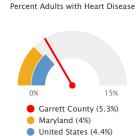

Report Area	65 Years and Older	Less than 65 Years
Garrett County, MD	29.93%	29.82%
Maryland	29.82%	29.28%
United States	27.36%	26.61%

### **Heart Disease (Adult)**

1,375, or 5.3% of adults aged 18 and older have ever been told by a doctor that they have coronary heart disease or angina. This indicator is relevant because coronary heart disease is a leading cause of death in the U.S. and is also related to high blood pressure, high cholesterol, and heart attacks.

Report Area	Survey Population (Adults Age 18+)	Total Adults with Heart Disease	Percent Adults with Heart Disease
Garrett County, MD	26,047	1,375	5.3%
Maryland	4,406,478	175,732	4%
United States	236,406,904	10,407,185	4.4%

Note: This indicator is compared to the state average.

### **Mortality - Coronary Heart Disease**

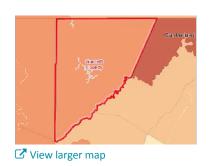

Within the report area the rate of death due to coronary heart disease (ICD10 Codes I20-I25) per 100,000 population is 149.2. This rate is greater than than the Healthy People 2020 target of less than or equal to 103.4. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because heart disease is a leading cause of death in the United States.

Report Area	Total Population	Average Annual Deaths, 2012-2016	Crude Death Rate (Per 100,000 Pop.)	Age-Adjusted Death Rate (Per 100,000 Pop.)

Report Area	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016
Maryland	8.16	7.32	10.06	9.77	9.36	7.97	7.03	6.49	8.9	8.4	7.5	8.28	9.32
United States	10.34	10.15	9.93	9.24	8.12	7.21	6.54	6.76	10.9	10.5	10.3	11.41	12.15

### **Mortality - Pedestrian Motor Vehicle Crash**

This indicator reports the crude rate of pedestrians killed by motor vehicles per 100,000 population. This indicator is relevant because pedestrian-motor vehicle crash deaths are preventable and they are a cause of premature death.

Report Area	Total Population (2010)	Total Pedestrian Deaths, 2011-2015	Average Annual Deaths, Rate per 100,000 Pop.
Garrett County, MD	30,097	4	4.4
Maryland	5,773,552	543	3.1
United States	312,732,537	28,832	3.1

Note: This indicator is compared to the state average.

Data Source: US Department of Transportation, National Highway Traffic Safety Administration, Fatality Analysis Reporting System. 2011-2015. Source geography: County

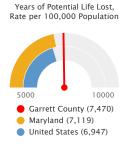

### Pedestrian Motor Vehicle Crash Mortality, Rate (Per 100,000 Pop.) by County, NHTSA 2011-2015

#### **Mortality - Premature Death**

This indicator reports Years of Potential Life Lost (YPLL) before age 75 per 100,000 population for all causes of death, age-adjusted to the 2000 standard. YPLL measures premature death and is calculated by subtracting the age of death from the 75 year benchmark. This indicator is relevant because a measure of premature death can provide a unique and comprehensive look at overall health status.

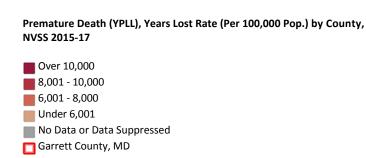

Report Area	Total Population	Total Premature Death, 2015-2017	Total Years of Potential Life Lost, 2015-2017 Average	Years of Potential Life Lost, Rate per 100,000 Population	
Garrett County, MD	80,346	418	6,001	7,470	
Maryland	16,992,066	68,476	1,209,739	7,119	
United States	908,082,355	3,744,894	63,087,358	6,947	

Note: This indicator is compared to the state average.

Data Source: University of Wisconsin Population Health Institute, County Health Rankings. 2015-17. Source geography: County

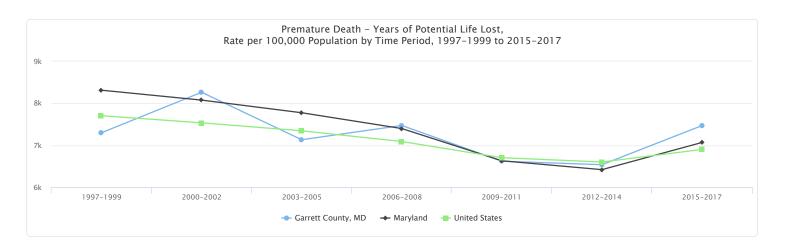

Premature Death - Years of Potential Life Lost, Rate per 100,000 Population by Time Period, 1997-1999 to 2015-2017

This indicator reports Years of Potential Life Lost (YPLL) per 100,000 age-adjusted population by time period.

Report Area	1997-1999	2000-2002	2003-2005	2006-2008	2009-2011	2012-2014	2015-2017
Garrett County, MD	7,300	8,263.7	7,133.3	7,472.1	6,620.5	6,536.9	7,469.5
Maryland	8,313.1	8,077.7	7,775.6	7,398.98	6,631	6,420.1	7,066.94
United States	7,705.2	7,535	7,345	7,090.49	6,703.7	6,601.2	6,900.63

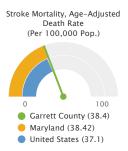

### Premature Death Rate per 100,000 Population by Race / Ethnicity

This indicator reports Years of Potential Life Lost (YPLL) per 100,000 age-adjusted population by race/ethnicity.

### **Mortality - Stroke**

Within the report area there are an estimated 38.4 deaths due to cerebrovascular disease (stroke) per 100,000 population. This is greater than than the Healthy People 2020 target of less than or equal to 33.8. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because stroke is a leading cause of death in the United States.

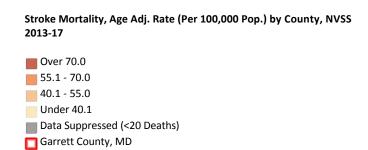

Report Area	Total Population	Average Annual Deaths, 2012-2016	Crude Death Rate (Per 100,000 Pop.)	Age-Adjusted Death Rate (Per 100,000 Pop.)
Garrett County, MD	29,537	17	58.9	38.4

### **Mortality - Suicide**

This indicator reports the rate of death due to intentional self-harm (suicide) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because suicide is an indicator of poor mental health.

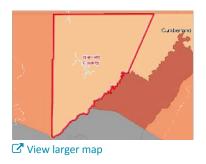

Report Area	Total Population	Average Annual Deaths, 2012-2016	Crude Death Rate (Per 100,000 Pop.)	Age-Adjusted Death Rate (Per 100,000 Pop.)

### **Obesity (Youth)**

This indicator reports the percentage of youth aged 10 - 17 who are obese, based on Body Mass Index (BMI). Children are classified as obese if their calculated BMI is in the 95th percentile or above for their age. This indicator is relevant because excess weight is a prevalent problem in the U.S.; it indicates an unhealthy lifestyle and puts individuals at risk for further health issues.

Report Area	Total Population (Age 10 - 17)	Number Obese	Percent Obese

# **Change in Total Population**

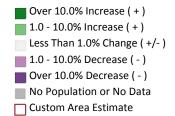

According to the United States Census Bureau Decennial Census, between 2000 and 2010 the population in the report area grew by 46,339 persons, a change of 10.49%. A significant positive or negative shift in total population over time impacts healthcare providers and the utilization of community resources.

### **Population Under Age 18**

An estimated 19.82% of the population in the report area is under the age of 18 according to the U.S. Census Bureau American Community Survey 2013-17 5-year estimates. An estimated total of 97,759 youths resided in the area during this time period. The number of persons under age 18 is relevant because this population has unique health needs which should be considered

#### separately from other age groups.

# Population Age 18-64

This indicator reports the percentage of population age 18-64 in the designated geographic area. This indicator is relevant because it is important to understand the percentage of adults in the community, as this population has unique health needs which should be considered separately from other age groups.

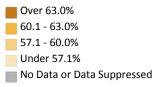

Report Area	<b>Total Population</b>	Population Age 18-64	Percent Population Age 18-64

### Population Age 65+

An estimated 17.12% of the population in the report area is age 65 or older according to the U.S. Census Bureau American Community Survey 2013-17 5-year estimates. An estimated total of 84,477 older adults resided in the area during this time period. The number of persons age 65 or older is relevant because this population has unique health needs which should be

considered separately from other age groups.

# **Population with Any Disability**

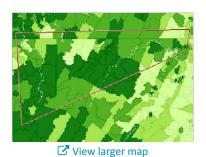

This indicator reports the percentage of the total civilian non-institutionalized population with a disability. This indicator is relevant because disabled individuals comprise a vulnerable population that requires targeted services and outreach by providers.

### **Population in Limited English Households**

This indicator reports the percentage of the population aged 5 and older living in Limited English speaking households. A "Limited English speaking household" is one in which no member 14 years old and over (1) speaks only English at home or (2) speaks a language other than English at home and speaks English "Very well." This indicator is significant as it identifies households and populations that may need English-language assistance.

### **Renter-Occupied Housing**

Tenure provides a measurement of home ownership, which has served as an indicator of the nation's economy for decades. This data covers all occupied housing units, which are classified as either owner occupied or renter occupied. These data are

13,323,495

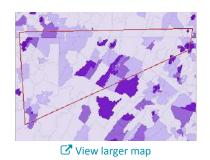

used to aid in the distribution of funds for programs such as those involving mortgage insurance, rental housing, and national defense housing. Data on tenure allows planners to evaluate the overall viability of housing markets and to assess the stability of neighborhoods. The data also serve in understanding the characteristics of owner occupied and renter occupied units to aid builders, mortgage lenders, planning officials, government agencies, etc., in the planning of housing programs and services.<sup>3</sup>

#### **Renter-Occupied Housing**

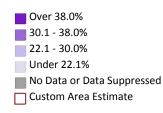

All occupied housing units that are not owner occupied, whether they are rented or occupied without payment of rent, are classified as renter occupied.

### **Household Composition**

This indicator reports the total number and percentage of households by composition (married couple family, nonfamily, etc.). According to the American Community Survey subject definitions, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption\*. A non-family households is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

\*Family households and married-couple families do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption.

Report Area	Total Households	Family Households	Family Households, Percent	Non-Family Households	Non-Family Households, Percent

# **Urban and Rural Population**

This indicator reports the percentage of population living in urban and rural areas. Urban areas are identified using population density, count, and size thresholds. Urban areas also include territory with a high degree of impervious surface (development). Rural areas are all areas that are not urban.

Report Area	Total Population	Urban Population	Rural Population	Percent Urban	Percent Rural

### Social & Economic Factors

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community's ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

#### Children Eligible for Free/Reduced Price Lunch

Within the report area 33,146 public school students or 47.17% are eligible for Free/Reduced Price lunch out of 70,276 total students enrolled. This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs. Additionally, when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

### **Education - Student Reading Proficiency (4th Grade)**

This indicator reports the percentage of children in grade 4 whose reading skills tested below the "proficient" level for the English Language Arts portion of the state-specific standardized test. This indicator is relevant because an inability to read English well is linked to poverty, unemployment, and barriers to healthcare access, provider communications, and health literacy/education.

### Income - Inequality (GINI Index)

This indicator reports income inequality using the Gini coefficient. Gini index values range between zero and one. A value of one indicates perfect inequality where only one house-hold has any income. A value of zero indicates perfect equality, where all households have equal income.

Index values are acquired from the 2013-17 American Community Survey and are not available for custom report areas or multi-county areas.

#### **Income - Median Household Income**

This indicator reports median household income based on the latest 5-year American Community Survey estimates. This includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income.

Report Area	Total Households	Average Household Income	Median Household Income
Allegany County, MD	27,759	\$56,646.00	\$42,771.00

### **Insurance - Uninsured Population**

The lack of health insurance is considered a key driver of health status.

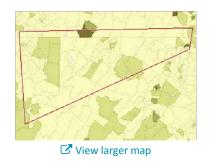

In the report area 7.84% of the total civilian non-institutionalized population are without health insurance coverage. The rate of uninsured persons in the report area is greater than the state average of 7.34%. This indicator is relevant because lack of insurance is a primary barrier to healthcare access including regular primary care, specialty care, and other health services that contributes to poor health status.

### **Population Receiving SNAP Benefits (SAIPE)**

This indicator reports the average percentage of the population receiving the Supplemental Nutrition Assistance Program (SNAP) benefits between the months of July 2014 and July 2015. This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs; when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

Report Area	Total Population	Population Receiving SNAP  Benefits	Percent Population Receiving SNAP  Benefits

### Poverty - Children Below 100% FPL

In the report area 19.81% or 18,847 children aged 0-17 are living in households with income below the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

# Poverty - Population Below 100% FPL

Poverty is considered a key driver of health status.

Within the report area 15.81% or 74,385 individuals are living in households with income below the Federal Poverty Level

(FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

## **Teen Births**

This indicator reports the rate of total births to women age of 15 - 19 per 1,000 female population age 15 - 19. This indicator is relevant because in many cases, teen parents have unique social, economic, and health support services. Additionally, high rates of teen pregnancy may indicate the prevalence of unsafe sex practices.

# **Unemployment Rate**

Total unemployment in the report area for the current month equals 10,799, or 4.5% of the civilian non-institutionalized population age 16 and older (non-seasonally adjusted). This indicator is relevant because unemployment creates financial instability and barriers to access including insurance coverage, health services, healthy food, and other necessities that contribute to poor health status.

Report Area	Labor Force	Number Employed	Number Unemployed	Unemployment Rate

# **Physical Environment**

A community's health also is affected by the physical environment. A safe, clean environment that provides access to healthy food and recreational opportunities is important to maintaining and improving community health.

## Air Quality - Particulate Matter 2.5

This indicator reports the percentage of days with particulate matter 2.5 levels above the National Ambient Air Quality Standard (35 micrograms per cubic meter) per year, calculated using data collected by monitoring stations and modeled to include counties where no monitoring stations occur. This indicator is relevant because poor air quality contributes to respiratory issues and overall poor health.

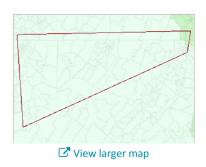

Report Area	Total Population	Average Daily Ambient Particulate Matter 2.5	Number of Days Exceeding Emissions Standards	Percentage of Days Exceeding Standards, Crude Average	Percentage of Days Exceeding Standards, Pop. Adjusted Average

# **Air Quality - Respiratory Hazard Index**

This indicator reports the non-cancer respiratory hazard index score. This score represents the potential for noncancer adverse health effects, where scores less than 1.0 indicate adverse health effects are unlikely, and scores of 1.0 or more indicate a potential for adverse health effects.

Report Area	<b>Total Population</b>	Respiratory Hazard Index Score

#### **Built Environment - Broadband Access**

This indicator reports the percentage of population with access to high-speed internet. Data are based on the reported service area of providers offering download speeds of 25 MBPS or more and upload speeds of 3 MBPS or more. This data represent both wireline and fixed/terrestrial wireless internet providers. Cellular internet providers are not included. This indicator is important because access to technology opens up opportunities for employment and education.

Report Area	Total Population (2010)	Access to DL Speeds > 25MBPS (2017)

# **Built Environment - Recreation and Fitness Facility Access**

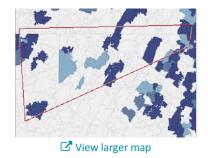

This indicator reports the number per 100,000 population of recreation and fitness facilities as defined by North American Industry Classification System (NAICS) Code 713940. This indicator is relevant because access to recreation and fitness facilities encourages physical activity and other healthy behaviors.

## **Climate & Health - High Heat Index Days**

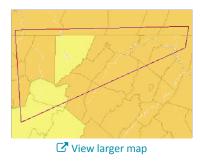

This indicator reports the percentage of recorded weather observations with heat index values over 103 degrees Fahrenheit. The "heat index" is a single value that takes both temperature and humidity into account. The higher the heat index, the hotter the weather feels, since sweat does not readily evaporate and cool the skin. The heat index is a better measure than air temperature alone for estimating the risk to workers from environmental heat sources.

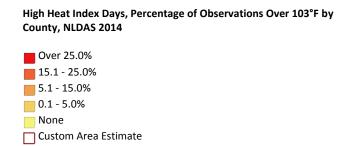

Report Area	Total Weather Observations	Average Heat Index Value	Observations with High Heat Index Values	Observations with High Heat Index Values, Percentage
Allegany County, MD	3,285	89.5	18	0.55%

### **Food Environment - Fast Food Restaurants**

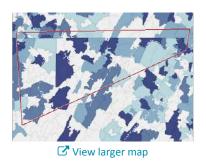

This indicator reports the number of fast food restaurants per 100,000 population. Fast food restaurants are defined as limited-service establishments primarily engaged in providing food services (except snack and nonalcoholic beverage bars) where patrons generally order or select items and pay before eating. This indicator is relevant because it provides a measure of healthy food access and environmental influences on dietary behaviors.

### **Food Environment - Grocery Stores**

This indicator reports the number of grocery stores per 100,000 population. Grocery stores are defined as supermarkets and smaller grocery stores primarily engaged in retailing a general line of food, such as canned and frozen foods; fresh fruits and vegetables; and fresh and prepared meats, fish, and poultry. Included are delicatessen-type establishments. Convenience stores and large general merchandise stores that also retail food, such as supercenters and warehouse club stores are excluded. This indicator is relevant because it provides a measure of healthy food access and environmental influences on dietary behaviors.

#### **Food Environment - Low Food Access**

This indicator reports the percentage of the population with low food access. Low food access is defined as living more than ½ mile from the nearest supermarket, supercenter, or large grocery store. Data are from the 2017 report, Low-Income and Low-Supermarket-Access Census Tracts, 2010-2015. This indicator is relevant because it highlights populations and geographies facing food insecurity.

Report Area	Total Population	Population with Low Food Access	Percent Population with Low Food Access

#### **Food Environment - Modified Retail Food Environment Index**

This indicator reports the percentage of population living in census tracts with no or low access to healthy retail food stores. Figures are based on the CDC Modified Retail Food Environment Index. For this indicator, low food access tracts are considered those with index scores of 10.0 or less.

# **Housing - Housing Cost Burden (30%)**

This indicator reports the percentage of the households where housing costs exceed 30% of total household income. This indicator provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels.

#### **Housing - Substandard Housing**

This indicator reports the number and percentage of owner- and renter-occupied housing units having at least one of the following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1.01 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30%, and 5) gross rent as a percentage of household income greater than 30%. Selected conditions provide information in assessing the quality of the housing inventory and its occupants. This data is used to easily identify homes where the quality of living and housing can be considered substandard.

# Substandard Housing: Households Lacking Complete Plumbing Facilities

Complete plumbing facilities include: (a) hot and cold running water, (b) a flush toilet, and (c) a bathtub or shower. All three facilities must be located inside the house, apartment, or mobile home, but not necessarily in the same room. Housing units are classified as lacking complete plumbing facilities when any of the three facilities is not present.

# Substandard Housing: Households Lacking Complete Kitchen Facilities

A unit has complete kitchen facilities when it has all three of the following facilities: (a) a sink with a faucet, (b) a stove or range, and (c) a refrigerator. All kitchen facilities must be located in the house, apartment, or mobile home, but they need not be in the same room. A housing unit having only a microwave or portable heating equipment such as a hot plate or camping stove should not be considered as having complete kitchen facilities. An icebox is not considered to be a refrigerator.

#### Substandard Housing: Households Lacking Telephone Service

A telephone must be in working order and service available in the house, apartment, or mobile home that allows the respondent to both make and receive calls. Households that have cell-phones (no land-line) are counted as having telephone service available. Households whose service has been discontinued for nonpayment or other reasons are not counted as having telephone service available.

#### **Housing - Vacancy Rate**

This indicator reports the number and percentage of housing units that are vacant. A housing unit is considered vacant by the American Community Survey if no one is living in it at the time of interview. Units occupied at the time of interview entirely by persons who are staying two months or less and who have a more permanent residence elsewhere are considered to be temporarily occupied, and are classified as "vacant."

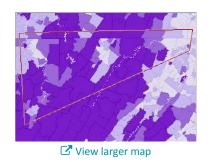

Report Area	Total Housing Units	Vacant Housing Units	Vacant Housing Units, Percent

# Clinical Care

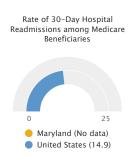

A lack of access to care presents barriers to good health. The supply and accessibility of facilities and physicians, the rate of uninsurance, financial hardship, transportation barriers, cultural competency, and coverage limitations affect access.

Rates of morbidity, mortality, and emergency hospitalizations can be reduced if community residents access services such as health screenings, routine tests, and vaccinations. Prevention indicators can call attention to a lack of access or knowledge regarding one or more health issues and can inform program interventions.

#### **30-Day Hospital Readmissions**

This indicator reports the percentage of Medicare fee-for-service beneficiaries readmitted to a hospital within 30 days of an initial hospitalization discharge.

#### **Access to Dentists**

This indicator reports the number of dentists per 100,000 population. This indicator includes all dentists - qualified as having a doctorate in dental surgery (D.D.S.) or dental medicine (D.M.D.), who are licensed by the state to practice dentistry and who are practicing within the scope of that license.

#### **Access to Primary Care**

This indicator reports the number of primary care physicians per 100,000 population. Doctors classified as "primary care physicians" by the AMA include: General Family Medicine MDs and DOs, General Practice MDs and DOs, General Internal Medicine MDs and General Pediatrics MDs. Physicians age 75 and over and physicians practicing sub-specialties within the listed specialties are excluded. This indicator is relevant because a shortage of health professionals contributes to access and health status issues.

#### Diabetes Management - Hemoglobin A1c Test

This indicator reports the percentage of diabetic Medicare patients who have had a hemoglobin A1c (hA1c) test, a blood test which measures blood sugar levels, administered by a health care professional in the past year. In the report area, 7,150 Medicare enrollees with diabetes have had an annual exam out of 8,255 Medicare enrollees in the report area with diabetes, or 86.62%. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

# **Federally Qualified Health Centers**

This indicator reports the number of Federally Qualified Health Centers (FQHCs) in the community. This indicator is relevant because FQHCs are community assets that provide health care to vulnerable populations; they receive extra funding from the federal government to promote access to ambulatory care in areas designated as medically underserved.

Report Area	Total Population	Number of Federally Qualified Health Centers	Rate of Federally Qualified Health Centers per 100,000  Population

# **Health Professional Shortage Areas**

This indicator reports the number and location of health care facilities designated as "Health Professional Shortage Areas" (HPSAs), defined as having shortages of primary medical care, dental or mental health providers. This indicator is relevant

because a shortage of health professionals contributes to access and health status issues.

Report Area	Primary Care Facilities	Mental Health Care Facilities	<b>Dental Health Care Facilities</b>	Total HPSA Facility Designations

### **Lack of Prenatal Care**

This indicator reports the percentage of women who do not obtain prenatal care during their first trimester of pregnancy. This indicator is relevant because engaging in prenatal care decreases the likelihood of maternal and infant health risks. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

## **Preventable Hospital Events**

This indicator reports the discharge rate (per 1,000 Medicare enrollees) for conditions that are ambulatory care sensitive (ACS). ACS conditions include pneumonia, dehydration, asthma, diabetes, and other conditions which could have been prevented if adequate primary care resources were available and accessed by those patients. This indicator is relevant because analysis of ACS discharges allows demonstrating a possible "return on investment" from interventions that reduce admissions (for example, for uninsured or Medicaid patients) through better access to primary care resources.

### **Prevention - Mammogram**

This indicator reports the percentage of female Medicare enrollees, age 67-69, who have received one or more mammograms in the past two years. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

### **Prevention - Recent Primary Care Visit**

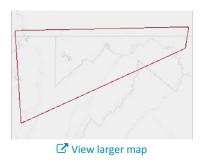

This indicator reports the number and percentage of adults age 18 and older with one or more visits to a doctor for routine checkup within the past one year. Data for this indicator is only available for the population within the top 500 most populous cities across the United States. County, State, and National values represent the population within those cities, and not the total US population.

## **Health Behaviors**

Health behaviors such as poor diet, a lack of exercise, and substance abuse contribute to poor health status.

## **Alcohol Consumption**

This indicator reports the percentage of adults aged 18 and older who self-report heavy alcohol consumption (defined as more than two drinks per day on average for men and one drink per day on average for women). This indicator is relevant because current behaviors are determinants of future health and this indicator may illustrate a cause of significant health issues, such as cirrhosis, cancers, and untreated mental and behavioral health needs.

#### **STI - HIV Prevalence**

This indicator reports prevalence rate of HIV per 100,000 population. This indicator is relevant because HIV is a life-threatening communicable disease that disproportionately affects minority populations and may also indicate the prevalence of unsafe sex practices.

Report Area	Population Age 13+	Population with HIV / AIDS	Population with HIV / AIDS, Rate (Per 100,000 Pop.)
Custom Area Estimate	419,388	680	0.16

### **Tobacco Expenditures**

This indicator reports estimated expenditures for cigarettes, as a percentage of total household expenditures. This indicator is relevant because tobacco use is linked to leading causes of death such as cancer and cardiovascular disease. Expenditures data are suppressed for single counties and single-geography custom areas. Rank data are not available custom report areas or multi-county areas. Expenditures data are suppressed for single counties and single-geography custom areas. Rank data are not available custom report areas or multi-county areas.

#### Current Smokers, Adult, Percent of Adults Age 18+ by County, BRFSS 2006-12

#### **Health Outcomes**

Measuring morbidity and mortality rates allows assessing linkages between social determinants of health and outcomes. By comparing, for example, the prevalence of certain chronic diseases to indicators in other categories (e.g., poor diet and exercise) with outcomes (e.g., high rates of obesity and diabetes), various causal relationship may emerge, allowing a better understanding of how certain community health needs may be addressed.

#### **Asthma Prevalence**

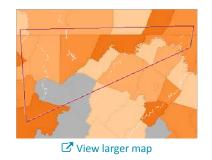

This indicator reports the percentage of adults aged 18 and older who self-report that they have ever been told by a doctor, nurse, or other health professional that they had asthma. This indicator is relevant because asthma is a prevalent problem in the U.S. that is often exacerbated by poor environmental conditions.

Report Area	Survey Population (Adults Age 18+)	Total Adults with Asthma	Percent Adults with Asthma

#### **Cancer Incidence - All Sites**

This indicator reports the age adjusted incidence rate (cases per 100,000 population per year) of cancer (all sites) adjusted to 2000 U.S. standard population age groups (Under age 1, 1-4, 5-9, ..., 80-84, 85 and older). This indicator is relevant because cancer is a leading cause of death and it is important to identify cancers separately to better target interventions.

#### **Cancer Incidence - Breast**

This indicator reports the age adjusted incidence rate (cases per 100,000 population per year) of females with breast cancer adjusted to 2000 U.S. standard population age groups (Under Age 1, 1-4, 5-9, ..., 80-84, 85 and older). This indicator is relevant because cancer is a leading cause of death and it is important to identify cancers separately to better target interventions.

#### **Cancer Incidence - Prostate**

This indicator reports the age adjusted incidence rate (cases per 100,000 population per year) of males with prostate cancer adjusted to 2000 U.S. standard population age groups (Under age 1, 1-4, 5-9, ..., 80-84, 85 and older). This indicator is relevant because cancer is a leading cause of death and it is important to identify cancers separately to better target interventions.

Report Area	Estimated Total Population (Male)	New Cases (Annual Average)	Cancer Incidence Rate (Per 100,000 Pop.)

# **Infant Mortality**

This indicator reports the rate of deaths to infants less than one year of age per 1,000 births. This indicator is relevant because high rates of infant mortality indicate the existence of broader issues pertaining to access to care and maternal and child health.

Report Area	Total Births	Total Infant Deaths	Infant Mortality Rate (Per 1,000 Births)

## **Low Birth Weight**

This indicator reports the percentage of total births that are low birth weight (Under 2500g). This indicator is relevant because low birth weight infants are at high risk for health problems. This indicator can also highlight the existence of health disparities.

# **Mortality - Cancer**

This indicator reports the rate of death due to malignant neoplasm (cancer) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because cancer is a leading cause of death in the United States.

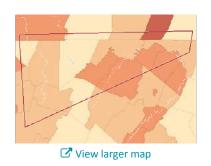

Report Area	Total Population	Average Annual Deaths,	Crude Death Rate	Age-Adjusted Death Rate (Per 100,000 Pop.)

## **Mortality - Homicide**

This indicator reports the rate of death due to assault (homicide) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because homicide rate is a measure of poor community safety and is a leading cause of premature death.

# **Mortality - Lung Disease**

This indicator reports the rate of death due to chronic lower respiratory disease per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because lung disease is a leading cause of death in the United States.

# **Mortality - Motor Vehicle Crash**

This indicator reports the rate of death due to motor vehicle crashes per 100,000 population, which include collisions with another motor vehicle, a nonmotorist, a fixed object, and a non-fixed object, an overturn, and any other non-collision. This indicator is relevant because motor vehicle crash deaths are preventable and they are a cause of premature death.

## **Mortality - Premature Death**

This indicator reports Years of Potential Life Lost (YPLL) before age 75 per 100,000 population for all causes of death, ageadjusted to the 2000 standard. YPLL measures premature death and is calculated by subtracting the age of death from the 75 year benchmark. This indicator is relevant because a measure of premature death can provide a unique and comprehensive look at overall health status.

# **Mortality - Suicide**

This indicator reports the rate of death due to intentional self-harm (suicide) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because suicide is an indicator of poor mental health.

## **Mortality - Unintentional Injury**

This indicator reports the rate of death due to unintentional injury (accident) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because accidents are a leading cause of death in the U.S.

## **Obesity (Youth)**

This indicator reports the percentage of youth aged 10 - 17 who are obese, based on Body Mass Index (BMI). Children are classified as obese if their calculated BMI is in the 95th percentile or above for their age. This indicator is relevant because excess weight is a prevalent problem in the U.S.; it indicates an unhealthy lifestyle and puts individuals at risk for further health issues.

Report Area	Total Population (Age 10 - 17)	Number Obese	Percent Obese	
Maryland	571,754	96,856	17%	
United States	30,059,005	4,851,000	16%	

Percentage of Children Age 10-17 Obese

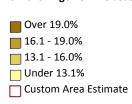

Note: This indicator is compared to the state average.

#### **Poor Dental Health**

This indicator reports the percentage of adults age 18 and older who self-report that six or more of their permanent teeth have been removed due to tooth decay, gum disease, or infection. This indicator is relevant because it indicates lack of access to dental care and/or social barriers to utilization of dental services.
