

**EARLY DETECTION  
CAN MAKE A HUGE  
DIFFERENCE.**

**BCCP**

Breast & Cervical Cancer Program

**IT IS IMPORTANT.**

- Take time to get a Pap test, mammogram, and breast exam
- Breast cancer is most easily treated and cured when it is found early
- Cervical cancer can be prevented by the detection of abnormal cells.

**Public Health**  
Prevent. Promote. Protect.

**Breast and Cervical Cancer Program**

*Updated 1/23/2017*

HEY LADIES!

The Garrett County Health Department offers **breast and cervical cancer screenings at no cost** for eligible Garrett County Women.

**GARRETT COUNTY  
HEALTH DEPARTMENT**

## WHAT'S INCLUDED?

Through this program, qualifying individuals will receive **AT NO COST**:

- A Pap test
- A clinical breast exam
- A mammogram
- Information about breast care
- Information on breast and cervical cancer detection
- Patient navigation services
  - Appointment scheduling services
  - Transportation assistance

## DO I QUALIFY?

- You are a woman 40 years or older
- You are a Garrett County resident
- You meet the income guidelines
- You do not have health insurance **or** your health insurance deductible has not been met

## WHAT IS BCCP?

The purpose of this program is to increase breast and cervical cancer screening levels among uninsured, low income women statewide, provide follow-up to diagnosis, carry out public and professional education, assure the quality of screening services, monitor the cancer problem in Maryland, and carry out evaluation of these programs.
