

Maryland State Health Improvement Process (SHIP)

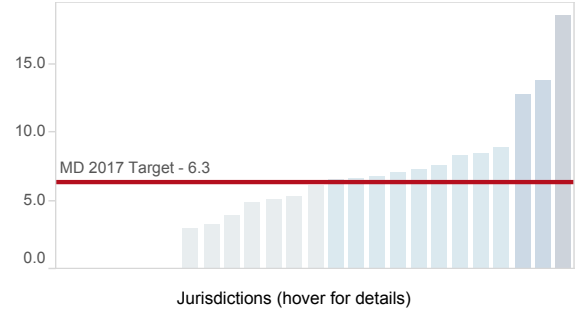

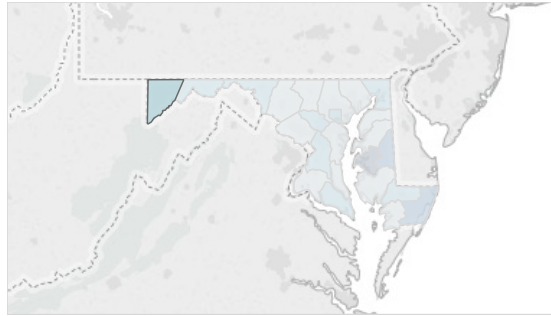

Focus Area
Healthy Beginnings

Indicator
Infant Death Rate

If charts and map are not present, select an Indicator for the current Focus Area selection. Select a jurisdiction in the map, table or bar chart to see the performance of that jurisdiction in the large chart area. Use the Ctrl key to select multiple jurisdictions.

Jurisdictions	Value
Maryland	6.7
Allegany	7.3
Anne Arundel	5.1
Baltimore City	8.4
Baltimore County	6.1
Calvert	
Caroline	12.8
Carroll	3.0
Cecil	6.8
Charles	4.9
Dorchester	
Frederick	3.9
Garrett	
Harford	3.3
Howard	7.6
Kent	
Montgomery	5.3
Prince Georges	8.9
Queen Annes	
Saint Marys	8.3
Somerset	
Talbot	18.6
Washington	7.1
Wicomico	6.5
Worcester	13.8

In the chart below, Change is from previous reporting period. Blue bar shows the jurisdiction value and red line shows the MD 2017 Target.

This indicator shows the infant mortality rate per 1,000 live births. Infant mortality has long been considered the most sensitive indicator of the overall health of a population. While there have been several decades of improvement in infant mortality, Maryland's rate remains higher than the national average.
